The Complete Windows 11 - User Manual 9th Edition

1. Notice

This book was produced in EPUB format by the Internet Archive.

The book pages were scanned and converted to EPUB format automatically. This process relies on optical character recognition, and is somewhat susceptible to errors. The book may not offer the correct reading sequence, and there may be weird characters, non-words, and incorrect guesses at structure. Some page numbers and headers or footers may remain from the scanned page. The process which identifies images might have found stray marks on the page which are not actually images from the book. The hidden page numbering which may be available to your ereader corresponds to the numbered pages in the print edition, but is not an exact match; page numbers will increment at the same rate as the corresponding print edition, but we may have started numbering before the print book's visible page numbers. The Internet Archive is working to improve the scanning process and resulting books, but in the meantime, we hope that this book will be useful to you.

The Internet Archive was founded in 1996 to build an Internet library and to promote universal access to all knowledge. The Archive's purposes include offering permanent access for researchers, historians, scholars, people with disabilities, and the general public to historical collections that exist in digital format. The Internet Archive includes texts, audio, moving images, and software as well as archived web pages, and provides specialized services for information access for the blind and other persons with disabilities.

Installing & Updating to Windows 11 Microsoft's latest version of Windows hit the update servers on October 5th 2021, but it seemed many computers were still waiting for the go-ahead from their Windows Update screens, if you are one of them we can help you. Here's how to step up the process. If you're still on Windows 10, and waiting patiently for your update screen to display the exciting 'Ready to update Windows 11' notification, then this is the guide for you. Rather than tweaking with the update settings, or delving into the murky depths of the command prompt, there's an easier way to get the ball rolling and get you on and working with Windows 11. Before You Leap ae Windows 11 Before we go about running the update process, it's worth checking that your system can actually run Windows 11. Many of us have already been down this route, and have discovered that we need to apply a few elements prior to installing the newest OS from Microsoft. TPM 2.0 TPM stands for Trusted Platform Module, and its task is to protect data through authentication, perform platform integrity, utilise disk encryption, and store passwords and certificates. In short, it's an extra layer of hardware protection to help stop your PC from being compromised or to stop many forms of malware from infecting the core components of your computer. Now that you know what TPM is, you can begin to understand Microsoft's insistence of it being present before even allowing Windows 11 to be installed. Windows is, by quite a margin, the most popular operating system in the world, and as such it's the main target for malware and many other very unpleasant things out there in the wild world. By using TPM, Microsoft is under the opinion that it's making things a little more difficult for any hackers and creators of malware. It is, however, totally possible to bypass the TPM requirements. Anyway, in general, if your computer is reasonably up to date, or roughly less than four years old, then there's a good chance that you have a TPM present in your system. For some systems, TPM comes in the form of an actual module that physically plugs into a socket on your motherboard, for most computers, though, TPM is offered via the processor. 6 www.pclpublications.com What you will need to do is drop into your BIOS, this can normally be done by tapping either the Del or F2 keys when you first power up your computer (before it starts to boot into Windows). Naturally, different motherboard manufacturers offer different keypresses, so you'll need to check

with your manual. MS cuick sios Ss EZ MOE) 7 OTEa 1 Wea OF GNIS 3.60 GHz 3200 MHz 30 f-™ NS wg ‘of SETTINGS When in the BIOS, look for Settings > Security > Trusted Computing. If you’ve got an AMD processor, you may also have to look for AMD CPU fTPM. Enable both, if available, save the settings and reboot the computer before your prodeed. These entries will differ from one motherboard to the next, as previously mentioned. You may need to Google your motherboard make and model number, together with the words ‘enable TPM’, to see how to specifically enable it for you. Once enabled, and rebooted into Windows 10, go to https://www.microsoft.com/en-gb/windows/windows-11, and scroll to the bottom of the page and click on the Download PC Health Check App button to start the download process.

Once it’s downloaded, double-click to install it. When installed, run the Health Check App, and look for the Check Now button in the Introduction Windows 11 section. Click it, and you'll be given a report as to whether your computer can run Windows 11 or not. If not, you’re told where it’s failed and you can look up what to do next and remedy the situation. (vy) This PC meets Windows 11 requirements Great news — Windows 11 is coming soon! Check device specifications for apps and features that exceed minimum system requirements and Windows 10 features that aren't available in Windows 11. See all results Device specifications Windows 11 Installation Assistant To force the update to Windows 11, providing your computer can handle it, you’ll need to run the Windows 11 Installation Assistant. This is a separate app that enables Windows 10 users, who have a valid Windows license, to update their computers to the latest version of Windows 11. You'll need to ensure that you have at least version 2004 of Windows 10 before you begin. It’s worth going to the Windows Update section in the Settings and checking for the latest updates. Windows Update Restart required Your device will restart outside active hours. Your device is missing important security and quality fixes. 2021-09 Cumulative Update Preview for .NET Framework 3.5 an¢ Status: Pending restart 2021-09 Cumulative Update Preview for Windows 10 Version 201 Status: Downloading - 100% Restartmow Schedule the restart View optional updates (0) Pause updates for 7 days Get the latest updates to pause again Db Install updates as soon as possible We'll notify you before the restart and you can postpone if needd iS) Change active hours “Currently 08:00 to 17:00 Re) View update history See what updates are installed on your device ‘™ Advanced options 5 Additional update controls and settings p Type here to search Updating to Windows 11 Windows 11 Installation Assistant Create Windows 11 Installation Media Ifyou want to porn asl dean nal Window 1 0 anew or ud Puts eptonto owed the meta creation fo to meh Boab USB OVD. © oor you vogn If all is well, head on over to https://www.microsoft.com/en-us/ software-download/windows11, and locate the Windows 11 Installation Assistant section. Click on the Download Now button, to save the app to your computer. Locate the app on your computer, and double-click it to begin the Windows 11 installation process. If everything is as it should be, you'll be presented with an Install

Windows 11 window. Click on the Accept and Install button to continue the process. Updating to Windows 11

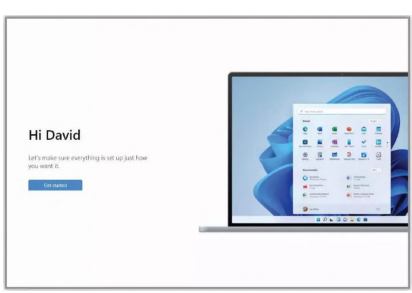
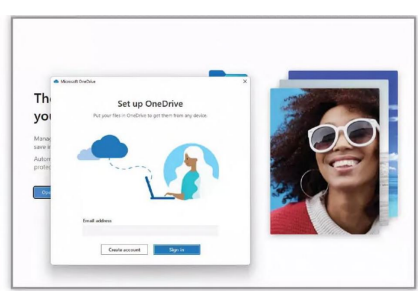
Download Windows 11
There are 3 options below for installing or creating Windows 11 media. Check out each one to determine the best option for you.
If you are upgrading from Windows 10, we recommend that you wait until you are notified through Windows Update that the upgrade is ready for your PC.
Before installing, please refer to the PC Health Check app to confirm your device meets the minimum system requirements for Windows 11 and check the Windows release information status for known issues that may affect your device.
Windows 11 Installation Assistant
This is the best option for installing Windows 11 on the device you're currently using. Click Download Now to get started.
Before you begin
Download Now
Create Windows 11 Installation Media
If you want to perform a reinstall or clean install of Windows 11 on a new or used PC, use this option to download the media creation tool to make a bootable USB or DVD.
Before you begin
Download Now

Windows 11 Getting Started Microsoft has greatly improved its initial Windows setup routine with intuitive guides. Where once you were simply delivered onto the desktop and left to your own devices, now Windows 11 ensures you can comfortably hit the ground running. Hello Windows 11 One of the first tasks to complete when you boot into Windows 11, is to run through the Getting Started guide. Here's how it works. You'll find the Getting Started guide in the Start menu, when you click the Windows logo button on the taskbar. It's a welcome to Windows setup wizard, and makes sure you're ready to use your files, and get access to your work quickly and effectively. Once it has opened, click the Get Started button to continue to the next step. Hi David everything is set up just how Microsoft's use of OneDrive for both business and personal data has become one of the cornerstones of the company's services. OneDrive offers a secure space to store your data, which will always be available no matter what happens to your computer. Click on the Open File Explorer button to begin your OneDrive setup and login. The perfect place for your files 8 www.pclpublications.com If you already have a OneDrive, or Microsoft, account, then click on the Sign In button to enter your details and link your OneDrive with the account on the Windows 11 PC you're currently setting up. If you don't havea OneDrive account, click the Create Account button and then follow the on-screen instructions. When you've completed the setup and logged into OneDrive, a special folder within your user account on the PC will be setup. This folder allows you to interact in real-time with the OneDrive cloud service, so any files created in the folder will be automatically uploaded to OneDrive; and vice versa. Your OneDrive folder x 'Your OneDrive folder is here





OneDrive will also setup an automated service that will backup any files and folders that you store on the Desktop, in your Documents folder, and in your Pictures folder. Click on the ‘Setting up folder back up’ link to add more folders to backup, or deselect any you don’t want to. Microsoft OneDrive Back up your folders Selected folders will sync in OneDrive, New and existing files will be added to OneDrive, backed up, and available on your other devices even if you lose this PC. Learn more. a _ Documents Desktop {orf Space left in OneDrive after selection: 1,001 GB Setting up folder back up... The service will help reduce the amount of space taken up on the PC, or other Windows 11 devices you’re using, by utilising Files On Demand. This is an automatic setup that will let you view and edit files on OneDrive without downloading them locally. You can, however, opt to makes files and folder Always Available. =... @® Microsoft OneDrive x All your files, ready and on-demand With Files On Demand, you can browse everything in your OneDrive without taking up space on your device. a» Ls 12) v) Online-only On this device Always available These files don't take up When you open a file, it space on this device, and downloads to your device they download as you use so you can edit it while them. you're offline. Right-click a file to make it available offline. Windows 11 - Getting Started Step 7 The next step in the Getting Started process has you viewing and selecting any of the popular apps that are currently available for Windows 11. Naturally, you can install these apps via the Windows Store at a later date, but having them to begin with can reduce the amount of time you spend setting up the computer. Select Microsoft Store apps to install “Netflix i | Twitter © Readit @® Pinterest o Dolby Access Telegram Desktop @ Adobe Photoshop Express: Image Editor, Adjustments, Filters, Effects, Bord A | Luminar Al oO Alexa Step 8 An interesting element to the Getting Started setup are the informational sections; such as this one. It details the new Search app that’s located on the taskbar. It also highlights the new Start launch taskbar, and shows how easy it is to use, and pin any Apps to. One place to Start Search for anything, anywhere, pin the apps you use the most, and see your recent files—Start is here for getting things done with fewer clicks and swipes. wOoOudoses www.pclpublications.com 9

Notifications will be displayed next to the date; as and when they're needed. This allows you to focus more on what you're doing without unnecessary distractions. www.pelpublications.com 15

Windows 11 Start Screen

Then and Now

We've come a long way since the early days of Windows version 1.0. Through ups and downs, Windows has evolved to become the most used desktop operating system in the world. Over 35 years have passed since Windows 1.0 has released, let's see what the next 35 hold for Microsoft's OS.

5 **Default Display**

The default Widgets display the latest news, the current weather, entertainment, recommanded websites and the state of Stocks and Shares. These can be dragged and dropped to different locations, changed or deleted.

How to Use the Start Menu The Start menu has been given a big makeover for Windows 11, simplified in some ways and expanded in others. It will quickly become your go to way to access your device, as it is the main way to access your installed apps, software and games. Get to Grips with Start If you have used Windows before, the Start menu shouldn't hold too many surprises for you, but it is still a good idea to familiarise yourself with its features. Step 1 The completely redesigned Start menu is opened Step 3 If the app you want to open is shown, click the by clicking on the Windows icon in the taskbar, or icon to open it. If not, you can click the "All Apps" by pressing the Windows Key on your keyboard. It opens above button to open the full, scrollable list of apps. You can change the the taskbar icons, floating in the middle of the screen. It will apps that appear here by right-clicking on the icon and choosing appear over the top of any open windows. "Unpin/Pin to Start" from the action menu. Notifications and Quick Settings There have always been pop-up messages in Windows but now there is a centralised way in which these are viewed and interacted with. In Windows 11, this is called the Notification Center, it works more like the notifications panel on a smartphone or tablet. Exploring the Notification Center The Notification Center is an important and useful element in Windows 11, providing you with access to the calendar as well as notifications and alerts. Step 1 New notifications and alerts will pop up at the bottom-right corner of the screen (by default, but you can change the notification settings), disappearing after a few seconds. After the initial pop-up has disappeared, you can view all current notifications by clicking on the time/date in the taskbar. MM Calendar Iben's Birthday All day event, 07 September 2021 Snooze for 5 minutes @ Snooze X Dismiss 1316 AB FD ® Gr5;20 Step 2 You can see if there are new notifications waiting to be viewed by the badge that will appear on the corner of the time/date in the taskbar. You can turn off these badges in the settings, but they are a useful and unobtrusive way to see, at a glance, if you have something requiring your attention. A em 13:47 07/09/2021 oe 18 ~~ www.pcelpublications.com Unlike Windows 10, the Notification Center (which was called the Action Center previously) only contains notifications and alerts, not quick settings. It does include the calendar now, which is expanded by clicking the arrow next to the date at the bottom of the notification panel. Step 3 Tuesday 7 September | September 2021 1414 4 AFD ® Grooj202 eo oe@eauws Above the calendar section is your notification panel. Notifications can be from the system (Windows updates for example), from your calendar, from apps and even from settings that need to be managed. Notifications are sorted into sections within the notifications panel; based on their type. How to Use the Taskbar If you are moving from Windows 10 to Windows 11, the taskbar will likely be the first and most obvious change you notice. The taskbar has always been a useful tool, but in Windows 11 it becomes the real focus of the desktop and contains even more features and tools. Mastering the Windows 11 Taskbar The taskbar has always been more useful than many users realise. In Windows 11 the emphasis has shifted much more towards a simplified, but still powerful, selection of pinned tools/ apps. Taskbar Layout The taskbar runs the full length of the bottom of the screen, and is now divided into two main sections: Start Menu/Pinned App and System Tools. In Windows 11 the taskbar app icons are arranged in the centre of the taskbar (although this can be changed), with system tools on the right. The first icon in the row of taskbar icons is the Start menu button. Clicking this opens the Start menu directly above the icons. You can right-click the Start menu button to see a jump menu of additional links and tools. These include a shortcut to shut down or sign out of your computer. the window, without actually selecting it.

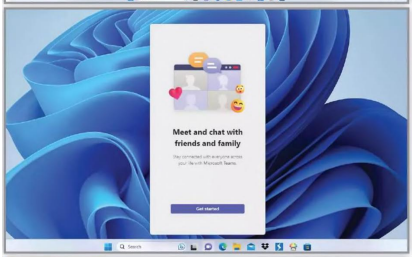
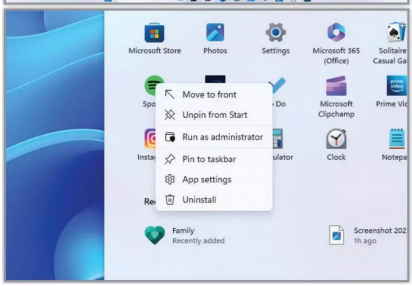
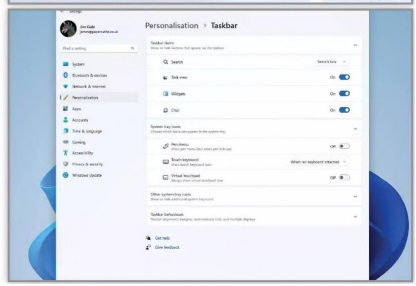
Wi-Fi status, sound and OneDrive.







Using Task View and Multiple Desktops Task View was introduced properly in Windows 10, as a way to make multi-tasking easier and allowing the creation of extra desktop areas. In Windows 11 it's even easier to instantly check and switch to open windows; and to create and manage multiple desktops. Using Task View Task View is a quick way to view and manage all of the windows and apps open on your PC at any given moment, even those that are minimised. Task View is accessed by clicking the third icon in Step 1 the taskbar; the white square on the black square. The Task View screen is split into two sections: Open tasks and desktops. Any apps or windows you have open, even if they are currently minimised, will be displayed in the open tasks panel. The size and shape of the windows shown in Task View depend on the size and shape of the actual window. For example, if you have Microsoft Edge open at full screen, it will be displayed as a wide rectangle in Task View. If you have a lot of windows open, the open tasks panel will be scrollable. 22 ~www.pclpublications.com Click on any window or app in Task View to open it at full size on the desktop. It will appear in front of any windows you already had open and visible on the desktop. You can also close windows or apps directly from the Task view. Just hover the mouse over the window and click the X button. Using Snap Layouts and Snap Groups Snap Layouts and Snap Groups, while similar to Snap Assist in Windows 10, are completely new features for Windows 11. Each is designed to make your life easier by giving you new ways to organise and retrieve apps and windows on a busy desktop. Using Snap Layouts Snap Layouts are a quick and easy way to organise a busy or cluttered desktop. They are similar to Snap Assist, but are created in a new and different way. Step 1 Snap Layouts can be created with just one open app or window, but really come into their own when several are open. Move your mouse over the Maximise button (top-right corner) of any open app or window, without clicking. After a second, a brand new menu will pop up, showing the available layouts you can use. o [al [3 Yehco [3 Whepecia [9 Facebook PF Twitter PREMIER LEAGUE There are 4 preset layouts available (at present, although more may be added): 2 equal windows side-by-side, 2 unequal windows side-by-side, 3 windows and 4 equal windows. Click on whichever you want to use, and the window/app you used to open the layout will snap into one of the positions. Your other open windows/apps will appear as previews in one of the other layout positions. Click one of them to open it in that layout position. The process is then repeated for any other open windows, if you choose a layout with more than 2 spaces. Windows are automatically resized to fit in the layout. Personalisation » Background y electricity cable from runch worsens If you now try to move a window or app out of the layout, it will switch back to its original dimensions when it unsnaps from the grid. You can create multiple Snap Layouts, each containing different apps/windows. These remain until the windows are closed or removed from the group. One of the Show Libraries Your Libraries in Windows 11 are preset system folders that are the default locations for your Camera Roll, Music, Saved Pictures, Documents, Pictures and Videos. You can easily have these displayed in the File Explorer. Right-click on any free area of the Navigation Pane and from the menu, click Show Libraries. You can then expand the list of libraries by clicking the small arrow. most useful tools in the View tab is the Details Pane

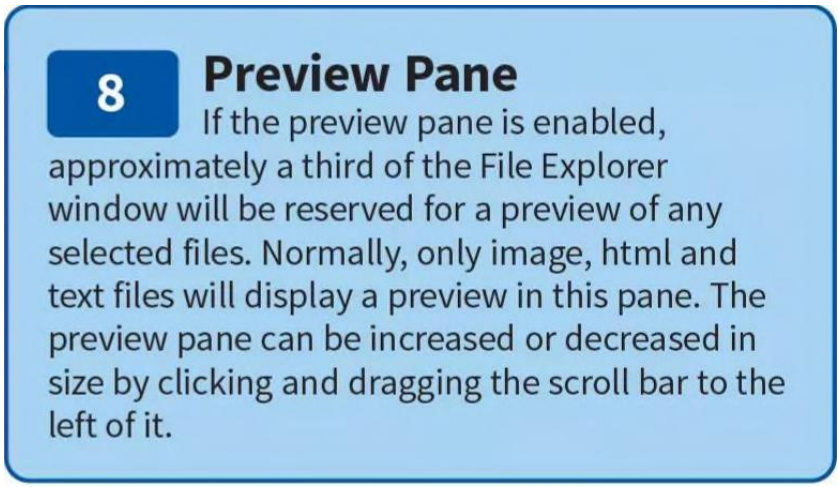
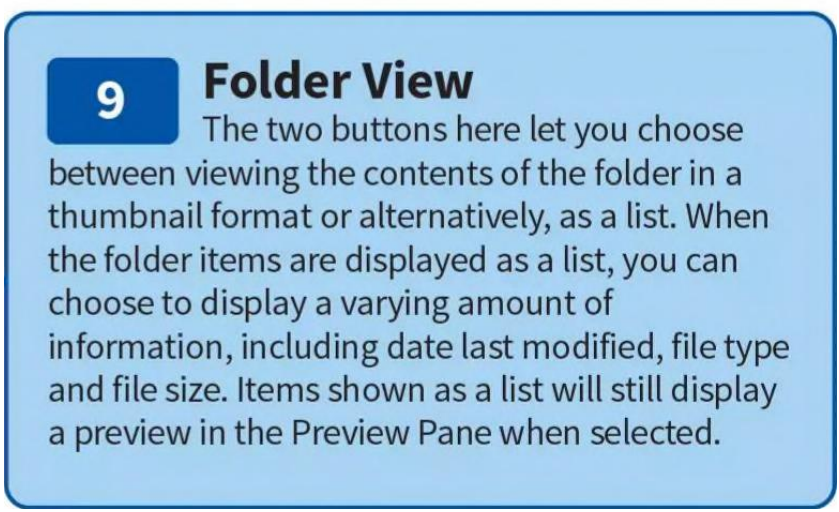
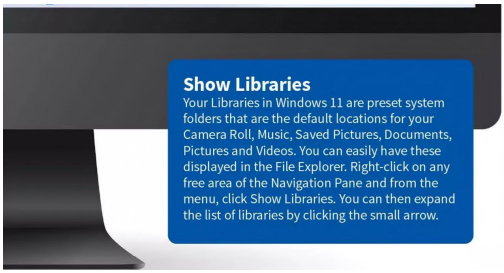
button. This switches the Preview Pane to show a list of file details instead. This is particularly useful if you are looking at images.



8
Preview Pane
If the preview pane is enabled, approximately a third of the File Explorer window will be reserved for a preview of any selected files. Normally, only image, html and text files will display a preview in this pane. The preview pane can be increased or decreased in size by clicking and dragging the scroll bar to the left of it.



9
Folder View
The two buttons here let you choose between viewing the contents of the folder in a thumbnail format or alternatively, as a list. When the folder items are displayed as a list, you can choose to display a varying amount of information, including date last modified, file type and file size. Items shown as a list will still display a preview in the Preview Pane when selected.



Show Libraries

Your Libraries in Windows 11 are preset system folders that are the default locations for your Camera Roll, Music, Saved Pictures, Documents, Pictures and Videos. You can easily have these displayed in the File Explorer. Right-click on any free area of the Navigation Pane and from the menu, click Show Libraries. You can then expand the list of libraries by clicking the small arrow.

The View Tab

The View tab in File Explorer allows you to completely change how the window looks, how files are displayed and even whether each item has a permanent check box next to it. One of the most useful tools in the View tab is the Details Pane button. This switches the Preview Pane to show a list of file details instead. This is particularly useful if you are looking at images.

How to Use File Explorer You can just use the powerful and improved search feature to find files and documents; but the new, simplified File Explorer is often a better choice, especially if you are looking for groups of files or want to preview several files to find the right one. What Features in File Explorer? File Explorer is a much undervalued part of Windows. And while it hasn't fundamentally changed for several versions of the operating system, Windows 11 has made some changes, which we'll take you through here. The way you browse files in Windows 11 is Step 1 ne \ : . Step 3 similar to previous versions of Windows, but File Explorer has been slightly simplified. The main Quick Access window shows you your most frequently used folders (after all, how many of us dip into more than five or ten folders ina day?) and also recent files. There are new icons across all File Explorer views. And there are a lot more file operations that you can access on the menu at the top of the window (known as the 'ribbon'), without the need to use the right-click menu. This makes it easier to use on PCs with touch screens. The sidebar also works on the same principle, and via a new Quick Access feature you can pin folders or files that you want to stick around. It will also show you Frequent folders too. You can pin things permanently onto Quick Access by right-clicking them and selecting Add to Quick Access. 28 ~www.pclpublications.com Step 4 The new icons are all fairly self-explanatory if you have used any PC in the past. There are icons for Cut, Copy, Delete, Rename and Share, as well as folder control icons like View and Sort. If you are unsure what any icon does, just hover your pointer over one to see a label pop up. é © > Picts-- > Camera Roll Share @® New ; W NL Sort D View 84 > Home FY Gallery GR Desktop & Downloads & Documents PR Pictures © Masic rr pexels-august-de-richelieu-4262414 Gi Videos

Create and Manage Folders Despite all of the changes to the Window's OS, folders have remained one of the core tools for organising your files. Much more than just boxes to keep your photos or music files in, folders can really help to improve how you use Windows 11 on a day-to-day basis. Creating New Folders It may seem too simple if you are a long time Windows user, but here's a look at how to create new folders on the desktop and within other folders. Step 1 On the desktop, right-click and select New folder from the action menu that appears. The familiar yellow folder icon will then appear at that position on the desktop (wherever you clicked), with the name automatically set as 'New folder' but highlighted ready to change. A Shortcut Bitmap image DOC Document DOCX Document View PPT Presentation Sort by G Refresh PPTX Presentation Text Document Paste shortcut XLS Worksheet Undo Copy XLSX Worksheet HPO Some Pe e8@ BF New Compressed (zipped) Folder v Display settings N ZY Personalise Shift + F10 §3 Show more options Step 2 You can leave the name as 'New folder' if you wish. If you then create a second folder next to the first, it will automatically be named 'New folder (2)? You can rename a folder at any time by left-clicking on the title once, or right-clicking and selecting Rename from the menu. (2) 30 =www.pclpublications.com Double-click any folder to open it and view the contents. You can move items into a folder by selecting, dragging and dropping into an open folder or a closed one. If the folder is closed, drag the selected items over the top of it until the folder is highlighted, then release. Step 4 To delete a folder, right-click on it and select Delete from the action menu. You can also click and drag the folder to the Recycle Bin icon on your desktop. Anything in the folder will also be placed in the recycle bin. To move folders around the desktop, just click, drag and drop them. “ = > Connecting Your * | PC to the Internet Setting an Internet connection is an important step. Windows 11 makes joining and managing networks easy, bringing all of the relevant settings together in one place, including VPN and hotspot settings; and even the Wi-Fi adaptor hardware properties. Connecting to Wi-Fi A Wi-Fi network connection is now by far the most common way people connect to the Internet. The process should be fairly familiar to you by now, but if not, here are the exact steps to connect. Step 1 If your computer is not connected to the Internet, side of the taskbar. You can either click this and select Wi-Fi from the quick settings, or you can open the main Settings app > Network & Internet > Wi-Fi (the best route with a brand new connection). Not connected You aren't connected to any networks System Bluetooth & devices Network & internet Ethernet Personalisation Authentication, IP and DNS settings, metered networ Apps VPN Accounts Add, connect, manage ® Time & language ik Mobile ho ete Share your Accessibility Flight mode Stop all wireless communication Privacy & security QB Prony Proxy server for Wi-Fi and Ethernet connections Windows Update Step 2 Use the slider switch to enable Wi-Fi on your computer. Now click “Show available networks” to see a list of the networks within range of your computer. This may take a few seconds to scan and find the networks. Hopefully you will see the Wi-Fi network you want to connect to. Network & internet > WiFi Show available networks VM6955042_EXT Living Room TV.m MurrayVWNA SKY20A37 ERM_CORPORATE ERM_FALLback 32 www.pclpublications.com Windows will display a small globe icon on the right Click on the required network name in the list and then click “Connect”. As this is probably the first time you are connecting, you will then need to enter the password (Network security key) for the network. Click “Next” and as long as the network/password is correct, you should be good to go. Network & internet > WiFi Show available networks VM6955042_EXT Secured Enter the network security key Living Room TV.m MurrayVWNA B SKY20A37 Step 4 To disconnect from the Wi-Fi network at any time, open Settings > Network & Internet > Wi-Fi again, and click on the networks list. Click the Disconnect button. You can also choose to Forget the network (sometimes useful for troubleshooting connections), in the Manage known networks section. Network & internet >» WiFi S WiFi

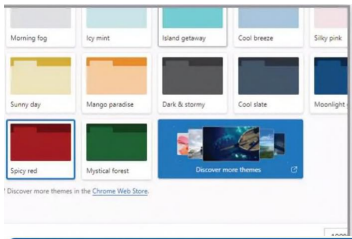
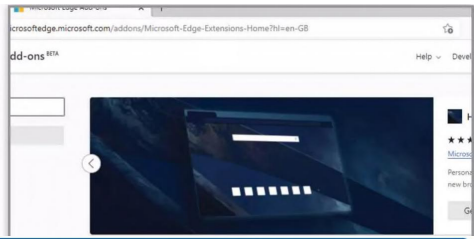
How to Use the Edge Browser Personalising Edge Aside from the customisations to the Start page, you can personalise the look of the browser in several other ways too. Light reYaDEyaallataiitcae = 'f you have changed the system WNelclsignlaaeeliicetam | ne default browser controls theme to light or dark, Edge are Back, Forward and Refresh should automatically be set to the same. You can, however, page. Open the menu > Settings > Appearance and you can scroll choose the theme for Edge separately to the system theme. Open down to see more buttons to add. These include Home (including the Edge menu > Settings, and click Appearance. Choose the light, | option to set the URL), Extensions, History, Downloads and dark or system default theme. strangely, a Maths Solver button. sy Statement Accept all Manage Bq eB i @ Edge BisYcialcoee «AS wellas light or dark, Edge lets you choose Extensions Just like the previous version, Edge Chromium from about 15 other theme colours, from features extensions, which are downloaded Morning Fog to Mystical Forest. Go to Edge menu > Settings> Appearance _ from the Microsoft Store. You can view installed extensions in the and click on the theme colour you want to apply. This will only apply Browser Menu > Extensions. There are fewer extensions available for colour to the top bar and tabs. It will not override the light/dark setting. the new version, but this situation will improve as it matures. Zoom Page zoom Edge Privacy Microsoft seems to be taking users' privacy choices seriously with Edge Chromium, and you now have a much easier way to control your browsing data and history. The biggest improvement is Tracking Prevention. You can access these settings in Browser Menu > Settings > Privacy & Services. Tracking prevention © You can view sites that you have blocked from tracking you, and also allow exceptions if there are sites which you want to allow to track you. You can choose three different levels of tracking prevention: Basic, Balanced and Strict. These options all block known Tracking prevention harmful trackers, but how personalised content (such as © Basic adverts) is displayed and how well all website features work, depends on the level you choose. Our advice is to switch to Strict and then see how it affects your favourite websites. If you find things are not displayed as they should be, you can always switch back to Balanced. Blocked trackers Exceptions



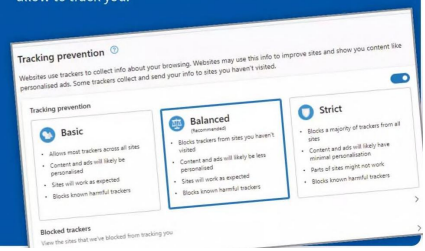


Edge Privacy

Microsoft seems to be taking users' privacy choices seriously with Edge Chromium, and you now have a much easier way to control your browsing data and history. The biggest improvement is Tracking Prevention. You can access these settings in Browser Menu > Settings > Privacy & Services.

You can choose three different levels of tracking prevention: Basic, Balanced and Strict. These options all block known harmful trackers, but how personalised content (such as adverts) is displayed and how well all website features work, depends on the level you choose. Our advice is to switch to Strict and then see how it affects your favourite websites. If you find things are not displayed as they should be, you can always switch back to Balanced.

You can view sites that you have blocked from tracking you, and also allow exceptions if there are sites which you want to allow to track you.



Tracking prevention
Websites use trackers to collect info about your browsing. Websites may use this info to improve sites and show you content like personalised ads. Some trackers collect and send your info to sites you haven't visited.
Tracking prevention
Basic
Allows most trackers across all sites
Content and ads will likely be personalized
Sites will work as expected
Blocks known harmful trackers
Balanced
Recommended
Blocks trackers from sites you haven't visited
Content and ads will likely be less personalised
Sites will work as expected
Blocks known harmful trackers
Strict
Blocks a majority of trackers from all sites
Content and ads will likely have minimal personalization
Parts of sites might not work
Blocks known harmful trackers
Blocked trackers
View the sites that we've blocked from tracking you

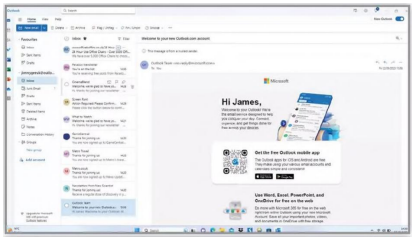
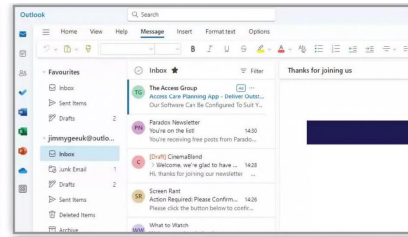
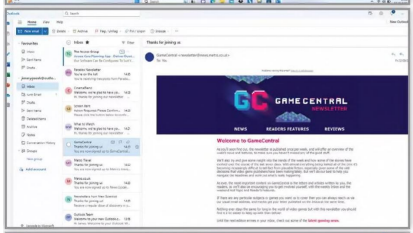
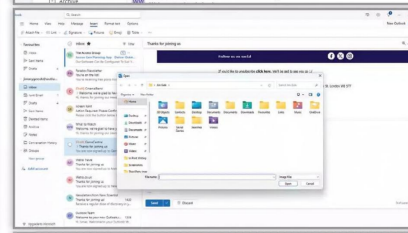
B Sent items W Deleted Items Tree Naelaaliaiitcae Adding file attachments to emails in the Mail app is easy. Write your email, and then click the Insert tab at the top. Here you can find the option for attaching files. Click the link and browse to the file you want to attach. Click "Open" and a thumbnail of the attachment will appear in the email. Responding to Emails When viewing any email in the Mail app, you will see a number of options at the top of the email panel. These include Reply, Reply All and Forward, etc., (all of the normal email options). Click reply and you can start typing your reply, with the original email included above your reply. 48 www.pclpublications.com Inserting Images As well as the button to include attachments, the Insert tab features a

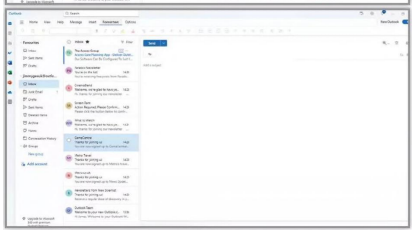
Picture button so you can insert an image into your email; as opposed to just sending it as an attached file. Once inserted, you can select it with your mouse and adjust its size (drag the corners as you can see in the example shown here). “his ema wos sent by Assocste Newspapers ts Nrthelifle House; 2 Dery St. Londen W ST Registered by England ane Wales with Compary number 3263662 METROcco.uk

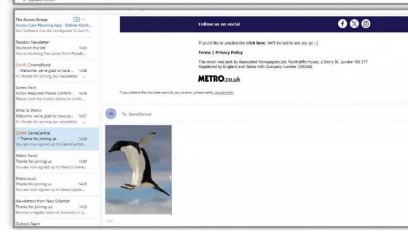




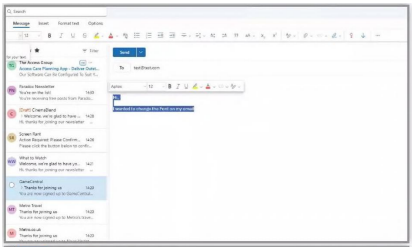


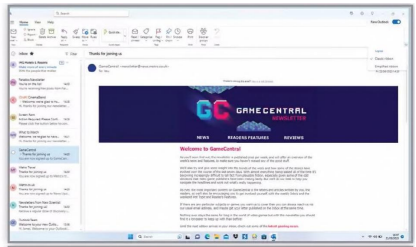


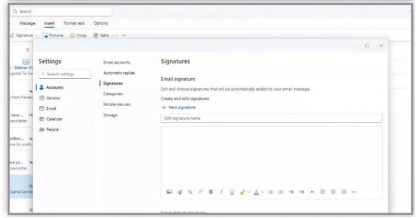




Customise the Mail App How to Use the Email App There are several ways to customise the Mail app to better suit your needs, from changing the background image and accent colour, to adding a signature and the display font. Background Image The background of the Mail app is set to an image by default. This is purely decorative, and can be changed. Open Settings > General. Appearence in the Mail app, then scroll to the bottom to see the different backgrounds available. Alternatively you can switch to Dark Mode from this link. a8.245 Meh fii bi Adi Mail App Colour The colour tint on the Mail app menu (on the left) and the colour of the accents such as buttons and highlights, can also be changed in the Personalisation settings. Just click a colour block to change it. You can also change the theme of the app from light to dark here, or use the Windows theme setting. Appearance 3 223 ubeRs 2232532 = Ett The default font for your emails is Calibri Body, unless you have changed it in the main system fonts options. This can be changed for any and all of your email accounts. Using the Font and layout customisation features which are accessed when sending an email, directly below the New Message bar. The default signature for the Mail app is “Sent from Mail for Windows”. The signature is automatically added to the end of your email message, but can be changed or turned off completely if not needed. Go to Settings > Signature, choose an account/all accounts and write your signature in the pane. | Settings Signatures Detver ©} at | Email signature cg 18 Aco B Genera tna caer Calesar 2 People You can easily control how you are notified of new emails. Go to Settings > Notifications, and you can control whether notifications are shown in the Notification center (Action center), if a sound is played and if pinned folders have notifications. As with other settings, you can apply to one account or all. Notifications In-app notifications Desitop rotiications Classic Display If you are already familair with a Windows based operating system you can revert to the classic Outlook email control layout by select the Layout pop up menu by tapping the downward arrow on the right side. Selecting the Classic ribbon option. eepOeCsevivaed







Search In Windows 11 It's hard to describe just how much better Search is in Windows 11, than in previous versions. Microsoft have done a lot to try to match the search functions on offer in rival operating systems, and the results can be seen in the new search feature. If you need to search for anything on your Windows 11 PC, the taskbar search tool is now the place to do it. The search field in the taskbar from Windows 10 is no longer there. You can also access search through the Start menu, or by pressing Windows key + S on your keyboard. Inside the Calendar App Calendar Updates The new Windows 11 Calendar app is one of a number of apps that Microsoft are actively updating on a regular basis. Features were removed and added even in the first few months of Windows 11's launch, and there's more to come. Whether any of the previous features that were removed will return is anyone's guess, as Microsoft is remaining silent. But, with each new update, the Calendar gets better, so keep an eye on it and see how it evolves over time. Fri, 22 Sep Nothing planned for the day Enjoy! Cua rvrHaicsasd A FMD ryom023 0 Calendar Pane The main Calendar pane, however you choose to view it with the View buttons, contains several different bits of useful information. Public and national holidays are automatically added, based on location. The current day is accentuated in your chosen highlight colour. Weather and temperature information is shown for the current day, along with a few days after. Clicking the weather symbol opens the Weather app. Add Event Click on any day in the main pane, or any hourly slot in day view, and a mini Add Event pane opens. You can use this to add an event to your calendar quickly. The pane includes event name, time-slots and location; it also lets you choose into which custom calendar you want to add it. If you choose to add more details, click the More Details button, if not, click Done to add the event. Calendar Settings Alongside various customisation settings, such as the ability to choose light and dark themes and change the default highlight colour, are settings for adding new email accounts and changing the default view. You can also add public or national holidays manually, in Calendar Settings, if they have not been correctly added automatically. ra Switch to Tabs The Mail and Calendar apps are closely linked, and you can quickly switch between the two using the buttons here. Receive an email with an appointment in it, and you can quickly add it to your calendar using the tools in the Mail app. You can also quickly switch to the People app and the ToDo app using the tabs/ buttons here.

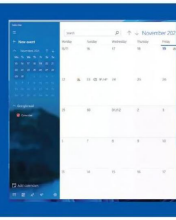
Inside the Calendar App

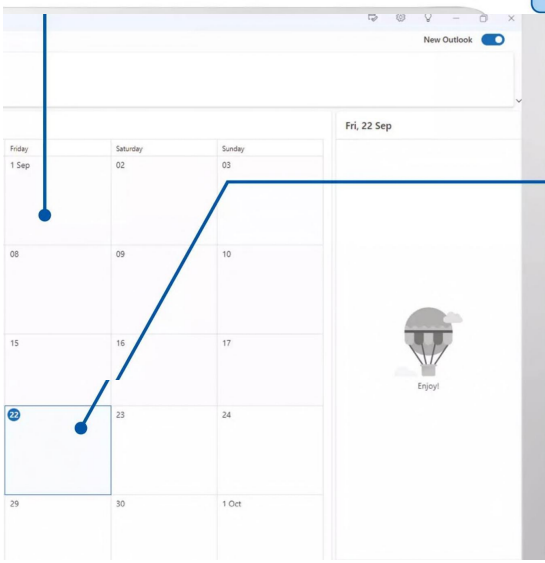
Calendar Updates

The new Windows 11 Calendar app is one of a number of apps that Microsoft are actively updating on a regular basis. Features were removed and added even in the first few months of Windows 11's launch, and there's more to come. Whether any of the previous features that were removed will return is anyone's guess, as Microsoft is remaining silent. But, with each new update, the Calendar gets better, so keep an eye on it and see how it evolves over time.



4 Calendar Pane

The main Calendar pane, however you choose to view it with the View buttons, contains several different bits of useful information. Public and national holidays are automatically added, based on location. The current day is accentuated in your chosen highlight colour. Weather and temperature information is shown for the current day, along with a few days after. Clicking the weather symbol opens the Weather app.



5 Add Event

Click on any day in the main pane, or any hourly slot in day view, and a mini Add Event pane opens. You can use this to add an event to your calendar quickly. The pane includes event name, time-slots and location; it also lets you choose into which custom calendar you want to add it. If you choose to add more details, click the More Details button, if not, click Done to add the event.

6 Calendar Settings

Alongside various customisation settings, such as the ability to choose the default highlight colour, are settings for adding new email accounts and changing the default view. You can also add public or national holidays manually, in Calendar Settings, if they have not been correctly added automatically.

Dates & Appointments with Calendar Digital calendars are no longer the preserve of business people scheduling appointments via email. With mobile phones now our new diaries, digital calendars are being used by increasing numbers of people to organise their busy lives. Welcome to Calendar. Setting Up Calendars The calendar can be a great productivity tool. We'll show you how to set up your calendar, arrange events and change settings, so your calendar is exactly the way you want it. Like Windows 11's email app, You'll be asked to enable location access Adding Calendars Allow Location : te Calendar also enables you to add for Mail and Calendar. This is multiple accounts; and from different providers too.So whether — predominantly for one simple reason - Calendar shows you the you use an Outlook calendar at work or have shared Google weather for your location each day. You can always revoke access calendars, you can join them all together in the Calendar app. via the Settings app. Go to Location and you can turn off To Start click on Add Accounts. Dates and Appointments in Calendar Creating and Managing Events In the Calendar app, the appointments and reminders you add manually are called Events. You can add multiple events to each day, add emojis and set events to repeat. The default view when opening the Calendar is the month view. You can switch to the different views (Day, Week, Month and Year) using the buttons along the top of the calendar. There is also a button here to take the view back to the current day, if you have been browsing future or past months. = o | Friday Saturday Sunday 01/10 Kel WW t4eyg˚ 3 Click the New Event button in the top left. Add the name of the event, a location should you wish to, plus start and end dates and times. You're also able to invite people by email using the field on the right-hand side. This will then insert the event into their calendar as well. Home © seve [fi] delete | showas Outof office Reminder: 15 minutes Details People ©» Gym - Leg Day! @ russ.ware@gmailcom - Gmail ~ Gmail Sort by Original order Location @ russware@gmailcom - Gmail Me russware@gmailicom Start 29 September 2021 © Writings and Stuff - Gmail End: 29 September 2021 @ Work Schedule - Gmail Event descnpption @ Deadlines - Gmail You can also add events by clicking on the relevant date block (or time block in Day view), and then adding the event details in the quick event pop-up box. If you want to see the full, new event screen at this point, you can click the "More details" link in the quick event box. 29 a 15˚/8˚ 16:30 Gym - Leg Day! 30 & 16/14" 01/10 Ht We 14s 3 © ~ Event name Y Allday © 00:00 @ Location QQ Remind me: 12 hours before ha 12 7 Meeting - Work You can also choose to set repeat events — just click the Repeat button in the toolbar when you're creating a new event. Check the days you want. You can repeat daily, weekly, monthly or yearly, depending on what you need to do. You can even set a date when the repeated events end. Step 5 If you opt for Slideshow, you will see some additional options to choose from. You can set the interval for the slide show from the ‘Change picture every’ menu and decide how you’d like the images to fit on the screen by clicking the ‘Choose a fit’ menu. Browse 1 minute 10 minutes | 30 minutes 1 hour 6 hours 1 day Personalising Windows 11 If you choose to set your desktop background as a solid colour, you will see a grid of about 25 colours that you can choose from. If you want to use a colour not shown in the grid, click on the View colours option and use the colour picker to select the exact colour you want to apply. Personalisation >» Background Pick a background colour Find a setting cl | a Setting Accent Colours By accent colours we mean the colour of the taskbar, the Start menu and the frames of new windows and so on, that you open on your computer. Aside from the desktop background, you can also Step 1 change the colour of the taskbar and the Start menu and other system components. Click on the Colours option in the main Settings sidebar. Here you will see several colour control options, including the option to choose light or dark mode. To apply a colour other than light or dark to the taskbar, Start menu and other accents, you need to first select Dark mode, then select a colour from the grid of colours and then select the option below that to “Show accent colour on Start and Taskbar”. You can also apply it to title bars and borders. Personalisation >» Colours | | Light mode is the default that Windows 11 is set to when installed. Select Dark mode to see an immediate and obvious change. Dark mode affects most menus like the taskbar, Start menu and folders etc. The third option is Custom, which lets you choose light/dark modes separately for system and apps. If you need to set the colour scheme to high contrast (if, for example, you have a vision impairment), you can access several preset colour themes from the Colours menu. You will see a preview of the different themes, and can then apply the one you like from the drop-down menu. 10 Ways to get more from Copilot The Copilot app is one of the most intriguing additions to Windows 11's portfolio of amazing features since its launch. As the use of Al in our delay life slowly increases, Copilot provides an expansive showcase of how far this technology has progressed since Cortana retired. What follows is our ten steps to getting the best from Copilot. From Set Up to reaching for the stars As the key part of the 2023 Windows 11 update and the replacement for the rather poor former Windows Al assistant Cortana, Copilot is packed with features. Let's take a look at our top picks. Copilot is a new feature of Microsoft's major 2023 Windows 11 software update, so before we start let's check you have the application installed. If you have, the quick launch link is automatically added to the task bar. If it's not there, you need to perform an update. Windows Update TM checking tor updates. La When you open Copilot, via the quick launch or Wint + C, you're given three 'conversation styles' you can choose from; Creative, Balanced and Precise. This choice massively changes your Copilot experience, and we would advise you to make the choice based on your task/question. a conversation style More Balanced are some things Co-pilot can help you do ulate my energy bill if | switched alectric Create a tabie that compares top-seling womer's running shoes 60 www.pclpublications.com Interaction with Copilot is performed via your voice or direct keyboard input, using the 'Ask me anything..' input bar at the base of the Copilot panel. Click the microphone icon to interact using your voice or click on the Ask me anything text to enter your request via the keyboard. Here are some things Co-pilot can help you do Write a C# program to check if a number is prime I need a gift for my friend who likes to hike in cold weather o % Tum on dark mode Voice input is processed by Microsoft * online services and is not collected or stored I'm listening. Now we're set up, let's start using Copilot. One core area of the app is using it to perform simple operational tasks on your Windows 11 device. For example, if you select the Precise conversation style and ask Copilot to "Send an email", it then asks you if you wish to open Outlook. Open an App Sure. Would you like me to open Outlook app for you? Yes No thanks Sure, you can use the Outlook app to send an email. If you need help with drafting the email, feel free to ask! ® [How do | download the Outlook app? | Can you help me draft an email? What is your email address?

How to Use Teams Chat Online meetings have been a big thing recently, so the addition of Microsoft Teams to Windows 11 makes sense. You'll need a Microsoft Teams account set up to use the chat and video meeting tools, but once you have, remote working becomes a whole lot easier. Setting Up the Teams App Getting started with Microsoft Teams on Windows 11 is relatively easy if you have a Teams account already set up, which we assume you do if you are trying to use this app. Click the Teams Chat icon in the taskbar, or open the Teams app in the main apps list. If your Microsoft account email matches the one you use when setting up your Teams account, the app should automatically detect it, and log you in to the app after a few moments. hy — ; Get all your recent chats at your fingertips Let's get you set up and ready to use Microsoft Teams. If the app doesn't recognise your email address, it will open the Teams login screen. Here you can choose an account to sign in to (if any are displayed), or you can pick another account. If you have yet to set up an account, you can use the link at the bottom and set one up in the browser. Welcome to Teams Chat and collaborate in one app. Pick an account Russell Ware russ.ware@gmail.com Russ Ware russ@bdmpublications.com Use another account 70 www.pclpublications.com Once signed in to your Teams account, the main app window will open. If you automatically signed in by clicking the Chat icon (step 1), you can access the Teams app by clicking the "Open Microsoft Teams" link at the bottom of the chat pop-up window on the taskbar. Chat Start a new private conversation Welcome to Teams! Here are some things to get you going, og So oe Pa ora rt a Start a group Get the Teams mobile app Stay connected across all your devices by downloading the Teams mobile app, Get the mobile app & Invite to Teams You can invite people to Teams using the button on the left sidebar. Clicking this will create a link that you can send to anyone you want to join Teams. You can invite people to chat by clicking the "Start a chat" button, then entering a name (if in your contacts), email address (anyone) or phone number. Using OneDrive Cloud Storage Microsoft's OneDrive has vastly improved over the years. Where once it was a simple backup and online storage solution, today it's now a connected collaborative service, with many excellent features. All of which make it one of the best cloud services available. Silver Linings Here's a quick guide on how to get the best from your OneDrive service, and how to ensure that your important data is always backed up and safely stored within that voluminous online cloud. You can check to see if you have Microsoft's OneDrive already loaded on your Windows 11 computer by clicking in the notification area in the bottom-right of the desktop. You're looking for a cloud icon. If it's not there, simply click the Windows Start button and type 'OneDrive' Click the OneDrive app that appears in the list. 2D onedrive| All Apps Decuments Web More Best match |™ OneDrive App. Search the web PD. onedrive - soo wob rosults Folders (6+) Documents (1+) Run as administrator Photos (8+) Open file location Pin to Start Settings (2) Pin to taskbar fi] Uninstall You may be asked to sign in with your Microsoft account, follow the instructions, and you'll notice that the cloud icon in the notification area may have an extra icon over it to indicate it's synchronising with your computer and OneDrive. If you click it, you'll notice a flurry of activity, this is because OneDrive is automatically backing up your files. (.) OneDrive is updating files... Learn How to Import Photos in Windows 11 Importing your photos to your PC may seem like a very simple task but if you have never done it before, you can encounter problems. We take a look at importing photos from your devices; using different methods and tools already included in Windows 11. Importing to a Folder The setup steps for connecting a mobile device to your Windows 11 computer are the same for almost all compatible Android devices. The app offers additional features for Samsung devices. The first thing you need to do to import photos directly from a phone or camera is to connect the relevant cable to your PC. In almost all cases, this will be a USB cable of some sort. You will have been supplied a transfer cable with the device you are using. Plug this into a free USB port. Step 2 Normally, when you first plug a device in to your computer which contains storage of some sort, Windows will ask how you want to handle the files in that storage. Scroll down the list to see 'Open in a Folder'. In some cases, Explorer will open showing the connected device. Russell's S21 Choose what to do with this device. Import photos and videos Photos Import photos and videos OneDrive Sync digital media files to this device Windows Media Player Open device to view files File Explorer Take no action 78 www.pclpublications.com Step 3 Now click on the device storage, this may be Phone and Card ona smartphone, and navigate to where the photos are stored. This will normally be in a folder called DCIM on your phone or camera. You can now simply cut and paste, or drag and drop, images to a new folder on your PC. = = Phone ® new WNL Sort S— View = = > ThisPC > Russell'sS21 > Phone > > & Downloads > @O Music > PR Pictures Alarms | Android vB Russell's S21 Audiobooks > = = Phone > [& Videos AudioEditorCutter > 'de 1313586004 (C:) > @ DVDRW Drive (E:) BOOF If you have connected your phone and PC using the Your Phone app, you can import images from your phone wirelessly. | Ps How to Manage _4@ and Edit Your Photos The Photos app was first introduced in Windows 8, but it wasn't the best experience. In Windows 11 it has been improved, even over the Windows 10 version, with better ways to browse photos and a lot more editing options to make the most of your images. Managing Your Images The Photos app has seen some useful improvements over the last few years and is actually very powerful now. It doesn't offer the flexibility of an app like Photoshop Elements, but it does simple image management well. Photos shows all of your imagesina chronologically displayed timeline of images (All Photos), with some automatically created collections (Memories) and further options below it. You can click on any image to get a full-window view of it, allowing you to view, adjust and edit it. Along the top of the full image view is a toolbar. This contains zoom and rotate buttons, an edit image button and draw button, as well as delete, add to favourites, file information, save as, resize and several more. You can click the Back arrow in the top left corner to return to the main image list. 80 www.pclpublications.com You can manage the main image view All Photos in several ways. The View by menu lets you switch between sorting images by date taken or recently added. On the opposite side of the screen are the view controls, changing between large view, medium view and small thumbnail view. @ All Photos 05 August 2020 - 28 September 2023, The Folders, accessed by clicking the tab at the left of the main window, enables you to creates groups of photos based on your specific criteria. For example, images that have been drawn on with Windows Ink, or images that have been tagged as favourites. robles © Folders

You can create your own folders by clicking the : The selected feature, found in the menu at the top “Move/copy” button. You can then select any right, enables you to select individual or multiple images in the Photos app you want to add. With alloftheimages images. You’ll see the top menu bar changes, and each image has a you want selected, click the Create button and the folder will be tick box appear on it. Click them to choose the images you want. You shown in the left panel. You can then rename the folder. can then use the tools at the top (share, copy, add to and delete, etc.). & All Photos The Timeline option is another automatically- The final option on the Photos home screen is created section, that builds collections of images Slideshow. This allows you to make videos made based on the date they were created. As you begin to add new photos, _up of multiple images or video clips in your collections. It isn’t the Timeline automatically places them and then sorts those images by most powerful video editing tool, but it enables you to create the differing dates they were created based on metadata. simple videos with music. — " Lead amen a 1 saree @ All Photos wins Sonron OD BW (05 gust 2020-28 September 2023 You can choose where Photos should look for An I To begin making a slideshow video, you first need to images in the app Settings. How to Manage and Edit Your Photos continued... Editing Images and Videos in Photos The editing tool in Photos may look deceptively simple, but while this is not for the professional, you do have a good selection of tools to make your images look better. Step 1 Double-click an image to open it in Photos. Along Step 4 Moving back to the edit section, at the top of the the top of the image are several buttons; click toolbar is the Filter button. Click this to enable the the Edit button. You see a new window and set of buttons and application to Auto Enhance the image itself. Alternatively, you can controls appear at the top. With all the edits shown here, ensure apply one of the filters from the listings on the left panel yourself by to save each as a copy to retain the original. selecting it. You can also increase the intensity of the filter here. From left to right, these buttons allow you to Crop, You can, of course, apply specific enhancements Adjustment, Filter, Mark Up and Retouch your yourself using the Adjustment option. Using the images. If you click on Mark-up you can access a selection of options at _ sliders you can edit core areas of your image. You will see the the bottom of the page. Make your choice and markupyourimageas changes applied to your image directly to the image in real time. you require. You can also delete your last mark - or all of them - too. Hit the Reset button in the top-right to undo your changes. Open a new image in Photos and click on the Moving on to the Re-Touch tool, click this and the Step 3 Edit button at the top of the screen. Note; the Step 6 cursor changes to a white circle, the size of which image is shrunk down slightly to fit the editing can be adjusted on the left. Place this over the part screen. Now select Crop. With this tool you can adjust the focus of the image you want to remove and click. The app matches what's area of an image, using the sliding bars on all four edges. under the spot to the scenery or colour around it, removing it. SeQeOeCuevnhcad 82 www.pclpublications.com

Moving to Video Editing, things get a lot more in-depth. For this guide we're going to show you the must-know basics on how to create your own mini movie. Click on any video you can access via the Photos app to open it. NOTE: videos are shown with a film strip icon on the top-left commer. & All Photos 124 photos. 1 vide 05 August 2020 - 03 October 2023 Steps | Your video now autoplays in a new window. You can view the video clip in this window, using the controls displayed at the bottom of the window. You can also access further controls using the More link. These include Cast to Device, enabling you to view the video on a networked device. CONNECT You can edit the clip to remove any content you no longer wish to view by clicking on the Video Trim option in the top bar. By doing this, your video opens in a new window; notice there are two large blue icons in the control bar at the start and finish of the scroll bar. Step LC : p Lt The blue icon on the left indicates the beginning point and the icon on the right marks the end. You can move each individually to create new start and finish points. When you're happy with the edited-down version of the video, you need to save it. Step 1] A great feature found here is the ability to pull a single image from the video clip using the Save a Frame option. Using the scroll bar, move through the frames to one you wish to save and then select the option from the list. You can now rename and save the image to your choice of location. 19. When you've finished editing an image, you can = click the 'Save a copy' button to create a new file that includes the changes, whilst retaining the original. Or you can choose 'Save' from the pop-up menu, which overwrites the original image with the version you just edited. ® Save a frame ® Cast to device & Import subtitle file Choose subtitles/CC > Choose audio track > —e of & @ www.pelpublications.com 83

Explore the Powerful Maps App Just like Google, Microsoft provides its own Maps app. This incredibly useful tool not only shows you a 2D map of anywhere in the world but also lets you see a satellite view, traffic information and even view major cities in 3D. You can even draw or write on top of maps. Directions You can use the Map app to plan routes: in a car, by public transport and even on foot. Select your chosen transportation method using the icons at the top of the Directions pane. You can either leave the A field as My Location or type a new one. In the B field, type your destination. The route will appear on the map. You can refine the route by clicking the Options button. Search Click the Search button on the left-hand side of the map window and a new pane will open. This pane contains some search suggestions, such as Hotels and Coffee and Shopping, with the standard search field at the top. As you type your search, suggestions will appear in the search pane. You can click any of these to find that location. Maps View The Maps view is the default one for the Maps app. This is what will greet you when you first load the app on your Windows 11 PC. You can zoom in and out of the map, using either the + and - buttons on the control panel on the right of the window, or by scrolling back and forward with the scroll wheel on your mouse (if you use one). 84 www.pclpublications.com Map Pp vs Bovey Tracey x yo urmmscuut x. Click the button to open the pane and you will see an alphabetical list of the cities with thumbnails that have been mapped in 3D. Click the Country/Region heading at the top to refine the list. Click on any of the thumbnails to load the 3D map; loading time will vary, depending on your Internet connection speed. van) Maps Settings The Maps app settings let you choose the units of measurement used, depending on your preference and your preferred defaults for directions and location. This last option will

be used if the app can't find you, by using location services. You can also download maps for offline use or upload maps that have been saved elsewhere, that have been shared with you perhaps. Saved Places The Saved Places pane contains all of your saved locations. These can be anything froma favourite coffee shop to the street where you parked your car in a new city. To add places, search fora location and select the star underneath the correct one in the search results list. You then have the option to give the favourite a nickname or set it as Home or Work. Rotate & Tilt The small floating control panel on the right of the Maps window contains several useful tools for changing the current view. The top two controls are rotate and tilt, allowing you to either rotate the map around the central point or tilt the map to give you an isometric view. You can easily centre your view on your location again by clicking the third icon down.

Explore the Powerful Maps App

4 Your Location
When you open the Maps app it will try to pinpoint your approximate location. You may be asked to allow this location tracking to happen. Your location will then be show on the map as a small black and grey circle. You can click on this to see more information, if available, and then save the location as a favourite by clicking the star in the pane that opens.

5 Windows Ink
Windows Ink allows you to write or draw on a map using the various pen tools (including colours). You can also use the pen to trace a route and have Maps tell you the distance of the line drawn, or even the directions for the route you marked out. You can then save the customised map. It is really very clever and fun to play around with.

6 3D Cities
The 3D Cities button should be fairly self-explanatory. Click the button to open the pane and you will see an alphabetical list of the cities with thumbnails that have been mapped in 3D. Click the Country/Region heading at the top to refine the list. Click on any of the thumbnails to load the 3D map; loading time will vary, depending on your Internet connection speed.

Learn How to Navigate with Maps Boasting excellent mapping, great aerial photography, up-to-the-minute traffic and the ability to calculate directions by public transport, road or foot, the Maps app is one of the very best ways to navigate. New additions make the Maps app even more useful. Moving Around in Maps There are few controls in the Maps app but they allow you to do a lot of things very easily. Let's take a look at how you move around in the app. | The easiest way to move the map around is to Sten 2 Clicking on things like Saved Places or 3D Cities in \ } left-click and drag it and use the mouse wheel or es the top control bar, tabs will line up alongside the trackpad slider to zoom in and out. This allows you to move the permanent Search and Directions buttons at the top left of the map around to focus on the area you need. If you are zoomed far window. You can then click on them at any time to see the out of the map, double-clicking the mouse zooms in quickly. information contained in each pane or tab. pl" rama — Teg Hennock i 'Wedevombe in the cor agen y Kingsteignton Buckland in the Moor jst ton , , Newton Abbot y st 7 pi j - her Sy all 4 [cen ee a { Deanpior Didworthy soup / Step 2 Maps has a dedicated control panel on the side of Step 4 Right-clicking on the map brings up a small Se the window containing, from top to bottom: ae action menu. Planning a Route Maps is great for checking out an area, looking around a city or just finding businesses local to you. It is also great for planning detailed routes. To start planning a route, click the Directions tab at the top left of the Maps window. A small panel opens with boxes for your starting and ending location. You can either type a destination or you can choose one from the list that appears below the box when you click on it. FORTUNE GREEN My location ©) London If you need to make detours or multiple stops along your route, you can click the + button to add more destination boxes. Each one can have a destination in it, making up your complete route. When you view directions, each of the destinations you added is marked with a relevant letter. A Newton Abbot 4 London Routes vary depending on whether you are driving, walking or need to take public transport. You can quickly flick between these options using the buttons at the top of the directions pane. When you have your start and end points entered and travel method chosen, click Get Directions. 728 min + 3518. \@ Share Ey print A) Newton Abbot London J 319 nip The route is now shown on the map, with an estimated travel time readout above the destination. If alternative routes are available, they are shown as a light blue line, with the main route shown asa dark blue line. Points along the route are marked, usually where a change of direction is needed. If you click Go in the directions pane, Maps switches to a satnav-style view and traces your route as you continue along it. This is more for portable devices such as phones and tablets that you might use for directions in a vehicle. Click the Exit button via the three dots in the bottom-right of the screen to return to the normal maps view. Proceed towards highlighted route Then) MSs B3195/The Avenue You can also plan a route by drawing it. Click the Ink button and then the Directions tool in the menu that opens. Draw a line along the route you wish to take and Maps refines that into a proper route along roads, missing dead-ends, etc. You can save or share the route just as with any other.

Manage Your Contacts in Windows 11 The People app has been a part of Windows 10 for some time, but in the more recent update to Windows 11, it has had an overhaul. The People app is no longer a part of the traditional taskbar, but instead Microsoft has incorporated into the Mail app. New People, New Apps Incorporating the People button into the Mail app is probably the more logical location for it; it's just we've gotten used to it being its own app via the taskbar. If you've not done so already, you'll need to Step 1 La open the Mail app. Start the process by clicking on the Windows icon in the Windows 11 taskbar, or tapping the Windows Key on your keyboard. This will bring up the Apps menu and last used files. O Type here to search Allapps > Ss B & © Calendar Microsoft Store Photos. Settings rey Oi Solitaire a Photoshop Express Instagram Calculator Recommended Step 2 Type 'mail' (without the quotes), and you'll see the Mail app icon appear on the list of available matching apps. Using the Sticky Notes Tool There are lots of Windows 11 apps for making reminder lists, but sometimes you just need a simple note to jog your memory. There is a simple, and often overlooked, piece of software in Windows that allows you to add sticky notes to your screen, quickly and easily. Getting Sticky Sticky Notes has been around since the early days of Windows Vista, and has evolved over the years in line with the core operating system. It's surprisingly effective, so here's how it works. Sticky Notes is available via the Windows Start To quickly create a new note, click on the smaller button, or by pressing the Windows key on your of the two windows; the new note window. The keyboard, and typing in 'sticky notes' (without the quotes). Clickon — cursor will appear where the window says, 'Take a note... and the Sticky Notes app that's listed in the search results. from there you can begin typing to create your note. Tips & Tricks

Installing a Printer in Windows 11 When you connect a printer to your PC or add a new one to your home network, you can usually start printing straight away. Windows 11 supports most printers, so you probably won't have to install special software. Here's how to install printers in Windows 11. Install a Local Printer A local printer simply means one that is physically connected to your laptop or desktop computer via a USB data cable, rather than being connected wirelessly. Step 1 In most cases, all you have to do to set upa printer is to connect it to your PC and let the plug and play software do its work. Plug the USB cable from your printer into an available USB port on your PC and turn the printer on. If nothing happens, try restarting your PC with the printer connected. Step 2 If so, click on it and then click Add Printer. The printer should then be installed and ready to use. If you don't see your device in the list, click 'Add Device' and see if the scan finds it. If it still does not appear, click the 'Add Manually' link that appears with, 'The printer | want isn't listed'. HPFA7983.home (HP ENVY 5000 series) Printer status: Idle = Printer settings Scanner settings Open print queue Print test page Run the troubleshooter If the printer does not set up automatically, you will need to do it yourself. Click the Start menu button and head into Settings. Look for Bluetooth & Devices from the list on the left-hand pane, and click it. Next, expand Printers & Scanners. You should see a list of available devices, hopefully with your printer's name shown. David's A12 Paired David's A12 Bluetooth & devices Paired Network & internet Personalisation Apps Bluetooth Discoverable as "MINIX-OFFICE Accounts ® Time & language ® Gaming = Devices Mouse, keyboard, pen, audio, displays and docks, other devices Accessibility Printers & scanners Preferences, troubleshoot Privacy & security Windows Update Your Phone Instantly access your Android d 96 www.pclpublications.com Printer properties This opens a step-by-step tool that will show you how to find and install software for an older printer, or one which is not yet supported by drivers pre-installed with Windows 11. If that still fails, try going to the printer manufacturer's website and download an installer or drivers. = Add Printer Find a printer by other options © My printer is a little older. Run the Troubleshooter

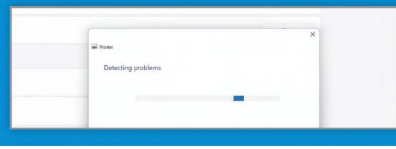
Head in to settings > Update & Security > Troubleshoot and run the Printer Troubleshooter. You can also type 'Printing problem' into the search box, select the search result labelled 'Help from Microsoft' and then select the troubleshooter to download it.



Manage Libraries in Windows 11 Libraries are virtual containers for users' content. A library can contain files and folders stored on the local computer or in a remote storage location. In Windows Explorer, users interact with libraries in ways similar to how they would interact with other folders. Quiet in the Library By default, Libraries are not displayed in Windows 11 - even later versions of Windows 10 did away with the Library display - so they'll need to be reactivated for them to appear. If you open Windows 11 File Explorer, you'll notice that Libraries are no longer visible by default, which is a shame as many users rely on them. However, they can be returned, and the process is remarkably simple. Start by pressing the Windows Key and R, then enter: control folders. Type the name of a program, folder, document or Internet resource, and Windows will open it for you. Ee Open: | SA Cancel Browse... Hit enter, or click the OK button and the File Step 2 : : Explorer Options window will pop up. The options available in here can drastically alter the way Windows Explorer works, so be careful what you enable or disable. Head to the View tab, and scroll down to the bottom of the Advanced Settings section. Advanced settings: @ Show sync provider notifications {_] Use check boxes to select items © Use Sharing Wizard (Recommended)) When typing into list view © Automatically type into the Search Box © Select the typed item in the view '& Navigation pane (_) Always show availability status {_) Expand to open folder {_} Show all folders @ Show libraries @ Show Network @ Show This Pc Restore Defaults Apply 98 www.pclpublications.com At the bottom of the Advanced Settings section, you'll notice a box labelled Show Libraries. Click the box to tick, and re-enable the option. When you've done that, click the Apply button to activate the change and you'll see that the Libraries are now available via File Explorer. Di Libraries @ New ~ 4 1 > Libraries > Camera Roll Library Saved Pictures Library YW Quick access @B Desktop Downloads B Documents DR Pictures *" 1 CommonSettings You can now close the File Explorer Options pop-up window. The Libraries are, by default, setup as area specific shortcuts. You can right-click each Library entry, select Properties from the menu, and create new Library locations, change the icon and much more. Restore Defaults will return the Library to its original setup. - Documents Music Library Library Videos library a Documents Properties Library Library locations: < B Documents ve

How to Libraries - AutoPlay Use AutoPlay Windows AutoPlay is a feature that was first introduced back in Windows 98. It allows newly discovered media, based on content such as images, video or music, to begin playing via the appropriate application. Rediscovering AutoPlay AutoPlay has been seen as both a blessing and a curse. How we have enjoyed slipping a DVD in the computer and sitting back to enjoy it, but swore at the machine for auto playing a CD we inserted. Funny old world. Windows 11 seems to be having some issues with the default AutoPlay setting. At the time of writing, there's a bug that affects some but not others, in that the Windows 11 AutoPlay feature is either disabled by default, or not. To find out which you are, go to Settings > Bluetooth & Devices, and click on AutoPlay. Mouse Buttons, mouse pointer speed, scrolling Pen & Windows Ink Right-handed or left-handed, pen button shortcuts, handwriting AutoPlay Defaults for removable drives and memory cards USB Notifications, USB battery saver, mobile device preferences Step 2 In our example, the AutoPlay feature was enabled. This means that whenever we insert some media, be it a disc of some description or memory card, Windows 11 will auto launch the appropriate app. However, if your AutoPlay isn't working, start by clicking on the On button at the top of the screen. © Settings David Hayward davidhayward! 19@googlemail.com Find a setting 2 Bluetooth & devices >» AutoPlay Use AutoPlay for all media and devices @ o @ system Choose AutoPlay defaults ! Select your friend from the search results, assuming you can see them in the list, and click Add to Contacts. Type a quick note to introduce yourself and then click Send. They will receive a request from you, along with the message and can choose whether to accept you or not. ul live:.cid.8¢c56167c89389206 * live:.cid.8¢56 16789389206 wants to connect with you vn You can select any contact from your contacts list and then either instant message them or start a voice or video call. If the contact you click on has Skype, the call option buttons will appear in the top right corner of the window. Click the relevant button to start a call. Making Calls with the Skype App If you want to make calls to contacts not using Skype (although you can make calls to mobiles and landlines too), you will need to add some Skype credit first. To do this, click on your profile picture in the bottom left and click the ‘Add Skype credit’ link. Skype also now includes Bots. Bots are artificially intelligent programs that can do many useful things like search for news, summarise webpages, play games and more. You can start chatting with a bot just like you chat with friends, just choose a bot and click Get started. Skype instant messaging makes it easy to keep in touch with your contacts and groups wherever they are. You can share files, photos and contacts. To instant message one of your contacts, select their name and start typing at the bottom of the main window. Bots vary in how useful they are but some are well worth taking a look at. Take the Bing s bot for example. Add this and then type a word (“football” for example) in the conversation window. The bot will return news stories based on that subject. Windows 11 Touchpad Gestures There's so much you can do with gestures, and Windows 11 has greatly improved the technology over its predecessor. Some apps have their own, unique, gestures, but the default and majority are listed here. Touchy Feely Gone are the days where we paw ineffectually at our screens, like a cat trying to capture a video of a bird. Windows 11 gestures encompass nearly every aspect of the operating system. Touchpad Gestures Here are the main gestures for use on Windows 11 touchpad laptops. It's worth noting that some of these gestures will only work with new precision touchpads. To find out if your laptop has one, click Start > Settings > Bluetooth & devices > Touchpad. Select an item Gestures Show all open windows Swipe with three fingers up on Tap touchpad the touchpad Scroll Show the desktop Place two fingers on the touchpad and Swipe with three fingers down on slide horizontally or vertically the touchpad Zoom in or out Place two fingers on the touchpad and Switch open apps or windows Swipe with three fingers left or right on pinch in or stretch out the touchpad Show Context Menu Switch desktops Tap the touchpad with two fingers or Swipe with four fingers to the left or press down in the lower-right corner right on the touchpad Note: Remember, some laptop manufacturer touchpads may operate differently to others. That shouldn't be the case, but for a long time there was little standardisation. This doesn't happen so much now, but if you own an older model laptop that works with Windows 11, then you may experience some problems or simply different gestures depending on the touchpad device you're using. In such circumstances, it's always best to consult the laptop manual, or see if there's an updated BIOS or driver to apply.

Touchpad Gestures

Here are the main gestures for use on Windows 11 touchpad laptops. It's worth noting that some of these gestures will only work with new precision touchpads. To find out if your laptop has one, click **Start > Settings > Bluetooth & devices > Touchpad.**

Action		Gestures	
Select an item Tap touchpad		**Show all open windows** Swipe with three fingers up on the touchpad	
Scroll Place two fingers on the touchpad and slide horizontally or vertically		**Show the desktop** Swipe with three fingers down on the touchpad	
Zoom in or out Place two fingers on the touchpad and pinch in or stretch out		**Switch open apps or windows** Swipe with three fingers left or right on the touchpad	
Show Context Menu Tap the touchpad with two fingers or press down in the lower-right corner		**Switch desktops** Swipe with four fingers to the left or right on the touchpad	

You can use these gestures on the touchscreen of any of your modern Windows 11 devices. To turn touch gestures on, click Start > Settings > Bluetooth & devices > Touch > Three- and four-finger touch gestures. Tap the screen Place two fingers on the screen and slide horizontally or vertically Place two fingers on the screen and pinch in or stretch out Press and hold the item Swipe with three fingers up on the screen | Other gestures Swipes 7 k ‘ . Using the Windows 11 Security Tools The Windows Security's set of tools may not be quite as comprehensive as one of the bigger Anti-Malware suites, such as BitDefender, but it does a good job of protecting the average user from the wealth of nasties out in the Internet. Virus & Threat Protection This is where to check and scan for viruses and other threats to your Windows 11 security. Here you will find tools for preventing viruses and other malware from ever taking hold of your computer, as well as the tools needed to check for anything which already got through your defences. Account Protection This is where you manage account and sign-in security for Windows 11. This includes the Microsoft account you are signed in to (or the option to sign in to one), Windows Hello and Dynamic lock. Clicking on any of the options here will simply take you to the relevant area of the main settings. Device Performance & Health Displays issues with the health and performance of your computer, including the status of the Storage capacity, Apps and software and the Windows Time service. This is also where you come if you want to begin the process of performing a Fresh Start on your computer. Family Options The Family options feature in Windows Security provides you with easy access to tools for managing your children's digital life. Use Family options to help keep your children's devices clean and up to date with the latest version of WIndows 11 as well as protecting your kids when they're online. 108 www.pclpublications.com € Settings Jim Gale a) james@papercutitd.co.uk Fin da setting p System Bluetooth & devices Network & internet Personalisation Apps Accounts Time & language Gaming Ac ibility Privacy & security Windows Update Privacy & security > Wir Windows Security is your home to view and mana health of your device. Using the Windows 11 Defender Tools Firewall & Network Protection Windows Defender includes three firewalls, for: Domain network, Private network and Public network. You can turn each of these firewalls on or off at will, although you will normally only be connected to one type of network at a time (if you are at home, usually a Private network). Apps & Browser Control This section contains the settings for Windows Defender SmartScreen. This ows Secu rity helps to protect your Windows 10 device from potentially dangerous apps, files, websites and downloads. It also includes a link to download Application Guard and lets you control Exploit protection. e security and Device Security Despite the title, this isn't really a hub for device security. You can learn more about Core isolation (virtualisationbased security) and enable the memoryintegrity feature, helping to prevent malicious attacks to core, high-security processes. Note: The exact options here can vary depending on device. Windows Defender Dashboard The dashboard is the main screen of Windows Defender and opens when you click the "Defender Firewall" icon in the taskbar. It lets you check the security of your computer at a glance, but doesn't really give you much information beyond whether an action is needed or not needed within the various security sections. wevavea Cs Ideally, you want to see a green tick on each section of the dashboard. If you see a warning symbol, there are suggested actions that you should take a look at, while a red X means something needs your immediate attention. www.pelpublications.com 109

5 Firewall & Network Protection

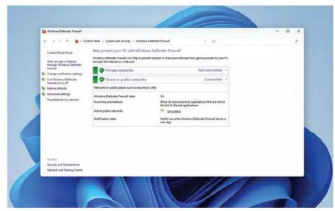
Windows Defender includes three firewalls, for: Domain network, Private network and Public network. You can turn each of these firewalls on or off at will, although you will normally only be connected to one type of network at a time (if you are at home, usually a Private network).

6 Apps & Browser Control

This section contains the settings for Windows Defender SmartScreen. This helps to protect your Windows 10 device from potentially dangerous apps, files, websites and downloads. It also includes a link to download Application Guard and lets you control Exploit protection.

7 Device Security

Despite the title, this isn't really a hub for device security. You can learn more about Core isolation (virtualisation-based security) and enable the memory-integrity feature, helping to prevent malicious attacks to core, high-security processes. Note: The exact options here can vary depending on device.



Windows Defender Dashboard

The dashboard is the main screen of Windows Defender and opens when you click the "Defender Firewall" icon in the taskbar. It lets you check the security of your computer at a glance, but doesn't really give you much information beyond whether an action is needed or not needed within the various security sections.

Ideally, you want to see a green tick on each section of the dashboard.

If you see a warning symbol, there are suggested actions that you should take a look at, while a red X means something needs your immediate attention.

What To Do If You’re Hacked There are literally hundreds of millions of email addresses and account details stolen by hackers each year, sometimes in a single massive breach, such as the Equifax attack from a few years ago, but sometimes directly from your own computer. Being the victim of a hack sounds scary to most people, but while you should take it seriously, there is often no need to panic. If you think you have been hacked, just follow the instructions here to get your online life back on track. 110 www.pclpublications.com

IH ' | | wilh 44,0) if hy TP ' aff ti HT MUL i wthh i _ a What To Do if You're Hacked How Will You Know? You may hear about a big data breach in the news, or from friends and colleagues, and if the company hacked is one you have accounts with, it is worth following all of the steps below just in case. Often, the first you will know about being hacked is a call from your credit card company or bank about unusual activity, or from friends/relatives suddenly receiving strange requests for money from you. Many of the large email providers, such as Gmail, will alert you if there is a new login to your account from an unrecognised location or device. Or you may simply find that you have been logged out of an account and your password is no longer working. The most important thing is not how you discover how you have been hacked, although we urge you to keep a close eye on all your online activity, but how you act immediately after you find out. You can check if your email address has potentially been involved in a data breach by entering it in to the Have | Been Pwned website. What To Do Next Even if you think only one account has been targeted, you should still move to protect ALL of your important accounts. This is especially true if you main email account has been breached, or if you use the same email and password for all of your online accounts. Change Your Passwords The very first thing you need to do is change all of your passwords, especially for your email account, banking accounts, credit card accounts, PayPal, etc. Many online accounts now offer 2-step verification, which adds an extra layer of security by sending you a passcode each time you try to log in. If this is available, set it up as soon as possible. If your email account password has been changed by the hacker, you will need to contact the provider and prove you are the rightful owner of that account. For Gmail, there are instructions for recovering a hacked account on the Google support pages (https://support.google.com). The other main email providers should offer similar advice.

Using the Windows 11 Task Manager The Task Manager is a very useful tool but even if you have been using Windows for some time, you might never have looked at it before. The Task Manager contains information on PC performance, the number of running apps, how many processes are pulling power from the processor and much more. -| | Processes Tab The Processes tab is the default tab when the Task Manager is opened. You can open the task manager by simply searching for it in the main search panel. Just as with any other app or piece of software in Windows 11, you can pina shortcut to the Task Manager, to the taskbar or asa desktop icon. Start-up Tab The Start-up tab contains a list of all the apps, programs and processes that are enabled every time you start your computer. If your computer is brand new, this list should be fairly small and filled with essential items. But as you install new apps and software, this start-up list can become bloated and slow down boot up. You can disable auto start-up here. Process List With the Processes tab selected, a list of all processes is shown. Processes are bits of software that run in the background, either running or waiting to run when a corresponding action is taken. As you can see from the list here, things like Cortana and AVG are shown; these you would obviously want to leave. 114 wwwpelpublications.com Task Manager Processes Performance App history Pp Startup apps 23 Users i= Details 3 Services Processes Name Status Apps (1) > (ij Task Manager Background processes (65) GH) AMD External Events Client M... 1H) AMD External Events Service ... Using the Windows 11 Task Manager

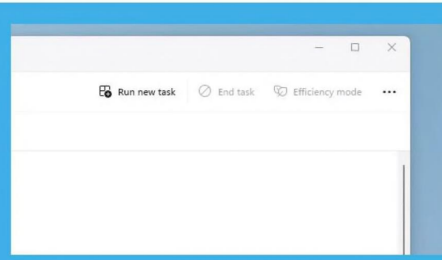
View Options

The View options at the top of the Task Manager window allows you to do several things. You can manually refresh the current tab and also change the automatic update speed. For example you can change how the processes are displayed. Either by grouping them by type, expanding or collapsing the list, or showing status values.



5 Resource Usage

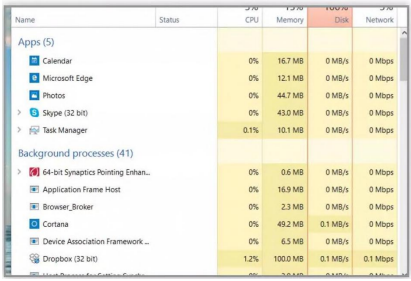
If you find your PC becoming slow and sluggish during normal use, you may have too many processes running. By looking at the resource usage chart, you can see exactly which apps are taking up the most processing power, physical memory, disk space and even network bandwidth. If something is particularly resource hungry, you can right-click and stop it.

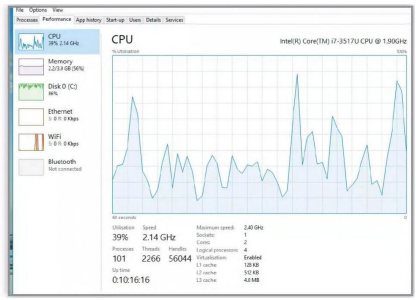
6 Settings

You can view a limited version of the Task Manager by clicking on the "Settings" button at the bottom of the window. This makes the window small enough that it can be left open, in the corner of your desktop for example, but still show relevant information. You can get more information at any time by clicking "More Details"

Monitor Tasks with the Task Manager If a program isn't working, or you want to control what starts with your PC or you want to see what's running, then visit Task Manager. Access it via the Power Menu (right-click on Start) or press Ctrl + Alt + Delete and select it from the Security Options menu. Manage Your PC Task Manager is a lot more complex than it used to be and it's now a useful insight into your PC and app performance, allowing you to check anything from Wi-Fi usage to app crashes and much more. Task Manager starts life as this fairly unassuming little window. If you have an app that is unresponsive, select it and click End Task. Beware that if you do this to an app with unsaved work in it, you will lose your work. Clicking the More Details button will expand the Task Manager window. B Calendar (E) Microsoft Word (32 bit) ai | People EX Photos © Skype (22 bit) This window is a little more complex, but the 'Apps' part of the window is essentially what we were looking at in Step 1. Now the apps have been joined by background processes. Your PC will most likely be running tens of these unless it's box-fresh. Here we've got 41. These are things such as Cortana, which runs in the background, and our trackpad software. Status Disk Network Ba Calendar 0 Mbps 0 Mbps 0 Mbps 0 Mbps 0 Mbps ie} Microsoft Edge BB Photos > ©& Skype (32 bit) > (Task Manager Background processes (41) > @) 64-bit Synaptics Pointing Enhan... fF) Application Frame Host GF Browser_Broker o Cortana Device Association Framework ... $B Dropbox (32 bit) 116 www.pelpublications.com Step 3 You can see what system resources each app is using in each column. Here Excel is using around 74MB of memory, for example. Memory use is almost at its maximum, as you can see at the top of the column. Maxed out resources are no bad thing - after all your PC is there to be used - but when apps crash, they are usually using resources and not relinquishing them. ne @ VirtuatBoxere VitualBoxexe @ VirtualBoxexe DD Cortana el Calendar BB People BD News (22 bit) BD Store ©] Microsoft Outlook Communica... Bait [Bi Windows Shell Experience Host HE] Reminders WinRT OOP Server System interrupts p(B Task Manager 3 WMI Provider Host VirtualBox interface b ® VirtualBoxexe & Microsoft Windows Search Filte. If an app crashes, then you need to select it and click End Task as before. You should always try and give it time to recover (especially if you will lose work). Now we've clicked the Performance tab at the top of the window and we can

see the usage of important elements of our PC. App history Start-up Users Details Services CPU Intel(R) Core(TM) i7-3517U CPU @ 1.90GHz oor 22/39 GB (56%) Disk 0 (C) \ 16% SOR OK | f\ J \ A \ha n\ Us Speed 39% 214GHz : Procesies Threads Handles 101 2266 56044 i Uptime t 0:10:16:16 u





Monitor Tasks with the Task Manager Here's our disk usage - as you can see it's pretty active! You will also have this if you have several big apps open (we've got Edge, Spotify, Word and Excel open in this example). In the previous step you could see our processor usage, and as you may have noticed, we've only been using around 40 per cent of its capability during the last minute. ae Disk 0 (C) Active time 100% ere Ni y AA / VAAN j NV Disk 0 (C) 99% 'SanDisk SSD U100 252GB Ethernet 5:0 R: O Kbps WiFi 5:0 F: O Kbps Bluetooth Not connected 60 seconds Disk transfer rate Activetime Average response time Capacty: 235 GB 99% 1247 ms Formatted: 235 GB System dist: Yes seconds Wi-Fi usage (you can also see wired network usage if you use that to connect) is more sporadic as the network connection tends to be used intermittently - unless you're copying files or similar. Here we're streaming music, which appears to download in chunks. Notice there's no data being received or sent right at this moment. CPU ae 15% 0,91 GHz WiFi Throughput 100 Kbps Intel(R) Centrino(R) Advanced-N 6235) Memory 2.2/3.9 GB (565) Disk 0 (C) 5% Ethernet 5: 08: O Kbps WiFi 0 R: OKbps: | Bluetooth Not connected IN 60 seconds { Send Adaptername. — WrFi2 The Start-up tab is one of the most important in Task Manager. While you can configure an app such as Skype to start-up when Windows does and disable the same within the app, some applications are sneaky and enable themselves to start when Windows does. Here you can select the app and either enable or stop this from happening. Defragment Your Hard Drive The act of Defragging your drive goes back to the early days of computing, where data was written to the drive in various sectors across the disk platters. This data could be spread all over, taking time to read, so a Defrag packs it all neatly into readable areas. Defrag Most of us have a modern PC with a relatively modern operating system installed on it, regardless of whether that's Windows 11, macOS or the latest distribution of Linux. These systems have been updated and tweaked in accordance with the advanced hardware technology that's now available, and will more than likely see you through a good year or so without you ever having to even look at a defrag tool. The for camp declare it the best thing you can do with a PC, and therefore it must be done every week. The against camp laugh heartily at the amount of time wasted, watching little blocks being moved around the screen while your hard drive

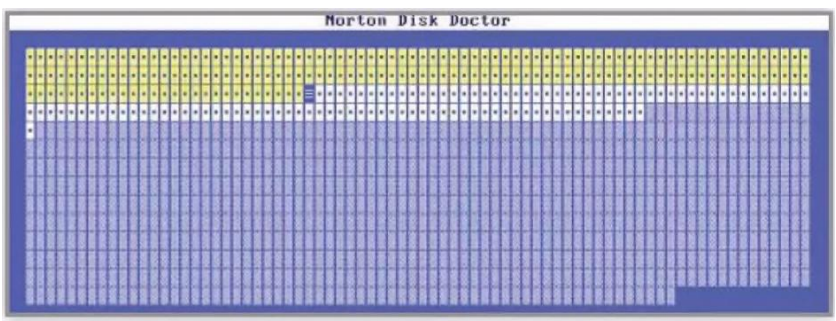
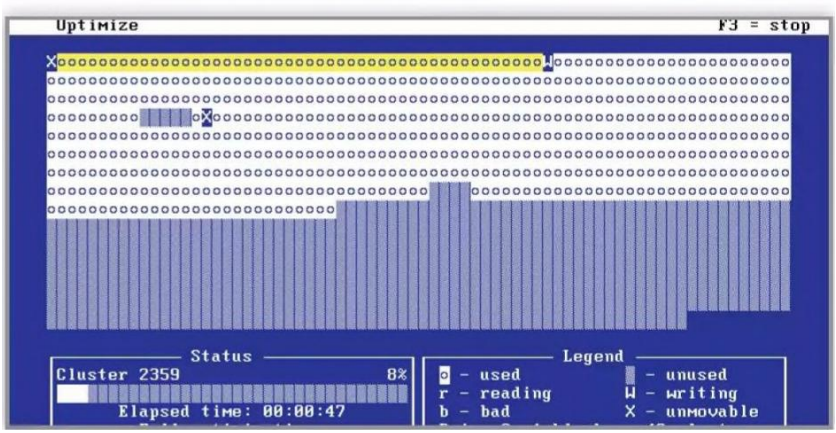
has the computing equivalent of an extreme workout. Ti Fragmented files [ll Contiguous files [i Unmovable files [] Free space (C:) Defragmenting... 1% Compacting Files ae This option will back up files on the volume.) GB Total Size: 40,9 GB Backup Now... | Although there are studies that show defragging every so often can help older operating systems and hardware, there's nothing concrete that suggests a weekly defrag will help out a modern operating system and hardware. In fact, if you've got a — — solid-state drive (SSD) installed you shouldn't be defragging = a_i — at all, especially if the SSD is one of the first or second generation models. But, and here's where things get a little grey, there are also many experts who think that defragging a modern SSD won't do too much harm, and won't necessarily impede the overall lifetime of the device - since SSDs have a significantly lower read/write lifespan compared to a more traditional, mechanical hard drive. 118 www.pelpublications.com





In truth, a monthly check of the state of fragmentation of your drives is considered a good idea. If Windows 11 recommends that you perform a defrag, then go ahead and do one. Otherwise, stick to the old adage: if it ain't broke... So, What is Defragging? As explained in the main intro of this page, over time the operating system will write numerous files to your hard drive. Those files can be the data you're working with, your personal data, work and such, and it can be temporary files that the OS works on in the background. For example, when you browse the Internet, temporary files are created for every page you visit, sometimes many per page depending on what's going on with the page in question. Most of these files are deleted once the browser has been closed down, some aren't. This creates areas of a drive that files now exist on, and areas where files did exist, which causes fragmentation. Each of these blocks of saved, deleted and moved data soon create fragmented sectors across the physical disk platter (we're talking about hard drives here, not SSDs). As the drive heads move along the platters to retrieve and write data - much like the needle on a vinyl record player - it has to travel more and from one end to the other to fetch the data, due to the inconsistencies created by the frequent writes and deletes. Defragging will move all that readable data to areas at the front of the drive platter, so the drive heads don't have as far to travel to read the data. This speeds up the reading of data, and helps get rid of any unwanted leftovers from the number of times a disk is accessed. Granted it does go into further depth, but we're not going to delve too deep here. If you want to understand more, then we'd recommend you look up defragmentation online. Do SSDs need Defraggi sandisk ss pLus Ask most folks in the know, and they'd say no, an SSD does not need to be defragged. This is understandable, as there are no physical platters or drive heads. The data written to an SSD viaa modern operating system is often put into a temporary position first, then committed to an area of the drive. If you defrag an SSD, then you're moving temporary files around before they're committed, then moving them once they are, so you're doubling the workload of the SSD. And, as we've already mentioned, an SSD has a much lower read/write lifetime than a mechanical drive. Defragment Your Hard Drive Plus, mechanical drives have average read/access times of around 15ms, whereas an SSD has access times measuring in the

0.1ms mark. So a defrag won't make any difference in access times. However, even ones and zeros written to solid state memory can get slightly fragmented over time. In which case, it's often best to check the state of the drive. Devices and drives (2) ads rH Local Disk (C) NEO Storage (D:) — ome | 177 GB free 13 GB CGC @ Network locations (2) | NASDrive ll Open Enter ASDrive] — (4 Open in new window D: .. Finding Other Drivers Update Your Device Drivers Good as it may be, the Windows 11 Update service doesn’t pick up all the latest drivers. A graphics card driver may offer better performance in a new game, so you'll need to look elsewhere. Many device manufacturers develop their own driver update software. The major graphics card manufacturers do (Nvidia and AMD), as well as the processor manufactures, Intel and AMD. For example, Intel uses the Intel Driver and Support Assistant. Simply click the icon in the taskbar, choose Check for Drivers, and you can download the latest available. Support Intel® Driver & Support Assistant loetity your products and yot driver and sftware updates fo mos of your nll hardware. View aU of ex slons © Default string Step 2 You may need to dig a little deeper to locate updated drivers for your devices. Printers are often covered by the Windows 11 Update service, but they can take time to filter through the service before reaching your desktop. To check on the latest drivers, go to your printer manufacturer’s support page, look for drivers and find the product you have. ‘rway nave on acer? Setar the pagers O¥N Sev / esa Welcome to Software & Drivers, let’s identify your product to get started Other | Step 4 | There are times when you may need to force Windows 11 to look for an updated driver beyond the one that it’s installed by default. When you connect a device, Windows 11 will automatically interrogate the device, and install the driver that fits the device signature. However, these aren’t always the best drivers. Right-click the Windows Start button, and select Device Manager. Power Options Event Viewer Device Manager Network Connections Disk Management Computer Management Step 5 From within Device Manager, find the newly installed device from the available list of categories. Click the arrow to the left of it to expand its details - in case there are more than one device available in the category. Right-click the device, and select Update Driver. This will open a new Update Driver window. fi Human Interface Devices "® IDE ATA/ATAPI controllers & Keyboards @ Mice and other pointing devices ® Monitors Generic Non-PnP MV [i Generic PnP Monit @® Network adapters © Other devices i Portable Devices & Print queues Update driver Disable device Uninstall device Scan for hardware changes © Printers DD Processors BB SD host adapters Wy Security devices Software components Properties | Step3 | Graphics card are devices that frequently having driver updates.

This is mainly due new games being released, and tweaked for certain cards, be that an NVIDIA or AMD card. There are also security fixes, and quality updates that can be applied, as well as some performance updates over time. Windows 11 is still quite young, so expect better drivers over time. READY DRIVERS /s Software devices The Update Driver window enables you to search for the device driver. There are two options: you can have Windows 11 automatically search your computer for updated drivers, or you can specify a location for Windows 11 to look for any drivers (such as any you've downloaded). Click the option that applies best for you. Improving the Windows 11 Firewall The built-in Windows 11 firewall is a surprisingly good security application. While it may not be as efficient as something offered by one of the third-party security suites, it's certainly more than adequate for the average user. Getting to Know Your Firewall Generally, there's little need to ever configure the Windows 11 firewall. However, getting to know how it works and improving it, is part of being more security conscious. Here's some tips on how to better manage it. Step 1 You can open the main Windows 11 firewall console window by clicking on the Windows Start button and entering 'firewall' into the search box. Click the returned link, Firewall & Network Protection, to launch it. D firewall & network protection All Apps Documents Web More Best match le Firewall & network protection System settings Firewall 6 network pec @ Windows Defender Firewall Control panel stem settin Apps sg Windows Defender Firewall with Advanced Security Settings @ Check firewall status 2 Allow an app through Windows Firewall W Windows Security The Windows 11 firewall console window should Step 2 : be On by default, unless you've installed a third-party security suite which contains its own firewall. There are two kinds of network listed: Private and Public (and Domain if you have Windows 11 Pro version). Private is for home or work, whereas Public is for cafés and the like. 6p) Firewall & network protection Who and what con acess your networks @ Home © Virus & threat protection Be Domain network & Account protection fice 07 '0 Firewall & network protection tg Private network (active) Firewalls on, iB Bates corer A = Public network Freya on. Secure Your Home Network We've mentioned previously that an attack doesn't always come from the other side of the globe but can indeed be a little too close to home at times. Home network hacking is possible with the simplest of tools; easily found on the Internet. Network Protection Without being too paranoid, it's remarkably easy to get into a neighbour's home network. If you live in a block of flats or you use powerline adapters, you may need to consider these ten steps for better network protection. The most common entry point to gain access to your network is via the router. The router from your ISP may well be offering the latest forms of encryption but it doesn't take a genius to trawl the less reputable sections of the Internet to obtain a list of passwords. Therefore, change the default username and password needed to access it. /\ Please enter the admin password If you've forgotten your admin password or can't login press the Help' button below Most routers these days come with a form of authentication called MAC (Media Access Code) address filtering. Every networkable device, computers, tablets, games consoles, come with a unique MAC address. The filtering allows you to enter the MAC addresses of your devices, so only they can be used on your router. Consult your router documentation for more details if required. Wireless Access Restnctions | Wireless MAC Filter Security 2 Gaming Wireless MAC Filter Wireless MAC Filter = Prevent : © Enable ' Prevent PCs listed from accessing the wireless Disable penml ay? = ® Permit only PCs listed to access the wireless network & uilinksys.com/files/(WRT54GL/4.30.0/WirelessMAC-Listhtm MAC Address Filter List Enter MAC Address in this format © xxxxxxxxxxxx Wireless Client MAC List 126 www.pclpublications.com Application It can be a pain but try disabling DHCP on your router and opting for static IP addresses. Every device that connects to a DHCP router will receive an IP address. By eliminating that you get to specify the address range available. It's not fool proof but it's worth considering. \Pv4 configuration My devices Address table Hub gateway IP address @ IP address: 192.168.1.254 @ Subnet mask: 255.255.255.0 DHCP server @ Enabled: @s) @ Server address range: Custom @ Authoritative DHCP: @ Start address: 192.168.1.2 @ End address: 192.168.1.253 0 | Hour(s) Valid leases are between 1 hour and 211 days @ Lease time: | a | Day(s) According to Trustwave's 2013

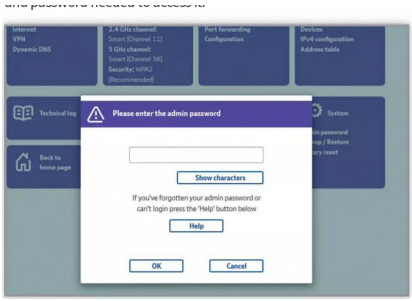
Global Security Report, many home network hacks are conducted when the household is away or asleep. This leaves the hacker with ample opportunity to steal bandwidth and view files you may have ona NAS drive. The short, simple solution is to power off the router at night or if you go out for the day.



Please enter the admin password

Powerline adapters are an excellent resource for connecting wired network devices, without trailing lengths of cable around the home. However, depending on the adapter, it is possible to use another adapter to gain access to yours. In newer homes it's an easy enough task to pick up another user's network, so use the Encryption button if the adapter has one. 4 2 CHNGA [7 pe Networking a home with Ethernet cables isn't a difficult project and it offers faster connection speeds than that of wireless. However, if you're living in shared accommodation or a block of flats, make sure that any unseen cable lengths can't be accessed by a neighbour. It's easy enough to splice into an Ethernet cable and steal bandwidth. Consider using a network mapping program, such as Open-AudIT, to gain a better understanding of what devices are attached to your network. Become familiar with the addresses, manufacturer, model IDs and so on of every connected object. That way, should anything new appear, you'll know it's not something you allowed. HOME QUERIES ADMIN HELP List Devices system-1 Workstation —«172.16.0.1 Microsoft(R) Windows(R) XP Professional 172.16.0.0, All, Windows, xP 172,16.0.0, All, Debian, Linux system-11 All, Linux, Virtual Status production system-2 Manufacturer VMware 172.16.0.0, All, Win7, Windows 172.16.0.0, All, Linux, Ubuntu syster-10 172,16.0.10 @ Debian Sarge » Tne. 7 Ultimate Model VMware Virtual Platform Serial 1234511 Form Factor Other (i vmware system-3 system-4 10.255.0.0, All, Printers system-5 Printer 10,255.0.5 & HP Laserjet 4100tn 10,255.0.0, All, Printers system-6 Workstation -192,168.0.6 Microsoft(R) Windows(R) XP Professional * 10.255.0.7 A Microsoft Windows 2000 Server 192.168.0.8 ar 192.168.0.0, All, Windows, XP system-7 10.255.0.0, All, Win 2000, Win Sv1 system-8 Router Cisco 1841 Router (10S v10.1) 192.168.0.0, All, Routers system-9 Router 192,168.0.9 tse Cisco 1841 Router (IOS v10.1) 192.168.0.0, All, Routers Secure Your Home Network Sharing resources and files from one computer to another is perfectly fine but consider sharing less if you live in close proximity to others. Once a hacker has gained access to your network, getting to any shared folders you have will be a doddle. In extreme cases don't share anything, but generally tighten password control. View Sort by Group by Refresh Customise this folder... Paste Paste shortcut Undo Rename Share with New > } Create or join a homegroup Properties Step 9

Remote administration on both the router and computer certainly can help you out when you're not at the keyboard. Perhaps you connect to your home network from work? Whatever the reasons, it does leave a potential gap in your home network security. Consider closing it completely or double-checking the authentication is top notch. How a VPN Can Improve Windows Security We've emphasised the enhanced privacy that a VPN offers when you're connected to its services, and the heightened levels of anonymity, but what security benefits does a VPN bring to a Windows 11 computer with an antivirus program already installed? Security Beyond Anonymity It's a good question: how can a VPN improve Windows security? While the privacy side is well catered for, there are some good security enhancements and features a VPN brings to the table. This doesn't happen often, but an ISP can To expand the previous feature, VPNs filter web become compromised and details of user pages that are dangerous or contain threats. Even activities leaked or stolen. Using a VPN can hide your browsing with a good antivirus client installed, you can still access a dangerous activity from trackers and even your ISP, enabling you to browse site. Using a VPN prevents the site from even being loaded. without the fear of having your details leaked or accessed by others. \le CyberGhost has protected you from malicious content! Public and free Wi-Fi hotspots are notorious when it comes to mobile security. Anyone with a little knowledge and some free tools via the Internet can intercept public Wi-Fi networks and hijack your connection, revealing all your data. AVPN encrypts the data and protects you. If you're working abroad, or you're a remote worker, a VPN connection to the company's servers ensures that all the sensitive business data remains secure. It's difficult for a company to ensure 100 per cent security with mobile and off-site workers, but a VPN provides a secure tunnel straight to the company itself. Say ke Ese 10001 0037001010100] PPO : 220: 7770 2077 I 277 BEER ove Kg cA \ The availability of iOS and Android VPN clients means that your call data and data stored on your device is also secure. Mobile VPN apps use the same levels of protection and security, so your data can't be stolen when you're not even aware of it. Most VPNs also add an extra layer of security whereby they actively block any advertising from websites. Internet ads are a necessary evil in some ways, as they provide much-needed funds for your favourite freely available websites. However, some contain malicious content and need to be blocked. Using HTTPS instead of HTTP utilises the secure side of the Internet protocol. Sadly, it's not always implemented either in browsers or by users. Many VPNs force all websites to use the secure connection that a HTTPS site offers, thereby enhancing your browsing security. In some countries, data retention laws are quite archaic, meaning governments and other bodies are able to access your data log for as long as you've been able to access the Internet. A good VPN won't detail any logs of your browsing and in most cases won't even hand over any personal information relating to you to other agencies. www.pelpublications.com 129

How to Create a Recovery Drive Arecovery drive is a useful way to ensure that you don’t lose data in the event of a critical malfunction. It can help you both troubleshoot and fix problems, even if the PC won’t start as it normally would. All you need is a blank, formatted USB flash drive. Protecting Your PC and Files Creating a recovery drive is a relatively simple process. It does however take a bit of time to create but it’s worth the effort as it could save you a lot of frustration in the future. Step 1 The first thing you need to do is find a USB drive Step 3 Your USB drive needs to be wiped of everything that is large enough and then make sure it is currently on it before the recovery drive is created. ready to be used. The USB drive you decide to use won’t be able You can do this during the set up process later or you can format it to be used for anything else like storing other files, etc. so make yourself right now: a useful thing to know how to do. Insert your sure it is a spare, or bought specifically for the task. USB drive into a free USB slot on in your computer. A basic Windows 11 recovery file will be less than Open the File Explorer on your computer and you 500MB but if you choose to include system files in should see the USB flash drive listed in the sidebar. the backup (recommended), so you can use it to reinstall Windows, _ It will probably be labelled as the (E:) or (F:) drive. Right-click on the you will need much more space. A basic recovery drive can be as drive label and select Format from the action menu. Leave the small as 1GB but a full recovery drive needs to be at least 8GB. settings as default (should be FAT32) and then click Start. You should now be ready to create your recovery drive. In the search field, type “Recovery Drive” and select the Recovery Drive app result. In newer versions of Windows 11, you might also be able to find the Recovery Drive in the main apps list, opened by clicking the Start menu button. D recovery drive| All Apps Documents Web More » Best match le Recovery Drive * App Settings Recovery Drive App (@ create a recovery drive Search the web Open D recovery drive - See web results Run as administrator D recovery drive windows 10 Open Ris oration! Pin to Start Pin to taskbar PD recovery drive usb Allow the software to “make changes to this PC” Ea and the setup wizard will open. This first screen is where you choose whether you want to back up system files with the recovery drive, so you can use it to reinstall Windows 11. If you do, tick the checkbox and then click Next. Create a recovery drive Even if your PC can't start, you can use a recovery drive to reset it or troubleshoot problems. If you back up system files to this drive, you'll also be able to use it to reinstall Windows. [A Back up system files to the recovery drive. Step 7 After a few moments, you will be asked to select the USB flash drive you wish to use. If you only have one USB drive inserted, it will be the only one shown and will be automatically selected. You are reminded again how much storage space the drive needs, and that all existing data will be wiped. Select the USB flash drive The drive must be able to hold at least 8 GB, and everything on the drive will be deleted. How to Create a Recovery Drive Step 8 Click Create on the next screen and the process will begin. This may take a while to complete, so go make a coffee and leave it to run. A progress bar shows how far along it is, should you need to check. Do not remove the USB drive, or turn off your computer, before the process finishes. Creating the recovery drive Step 9 When the process is complete, you should be prompted to delete the recovery partition on your PC, to save some space; as long as you plan to keep your recovery drive, this is safe to do. If you are not sure, you can leave the recovery partition in place; it can be deleted at a later date if you wish. The recovery drive is ready Step 10 If you did not already have a recovery partition on your computer, you won’t see this step. You will simply be informed that the recovery drive is ready, and to click Finish. Remove the USB drive from your computer and put it somewhere safe. It is a good idea to label the drive so it is not reused.

Windows 11 Power Options If you use Windows 11 on a desktop PC, you might adjust the power options for how long the PC sleeps or when the display turns off when inactive. With a laptop, the Windows 11 power options should definitely be something with which you are more familiar with. View, Switch and Create Power Plans Within the Power Options panel you can choose from preset Windows 11 power plans, or you can create your own based on your computers' power requirements. Step 1 Click on the Windows 11 Start button and enter: Control, then click the first result, Control Panel App. From there, select System and Security > Power Options. Windows 11 will, by default, have selected the Balanced power plan. This is designed to balance performance and energy consumption, and is best for PC's that are connected to the mains. 4D > Control Pane! » Hardware and Sound > Power Options sdware and eyster cattings (ike dieplay brightnec, cep, etc: that manages mote about power plans Selected plan Balanced (recommended) Cheng plan setings 'Autorticaly balances pesformence with energy consumption on capable hardware. Change when the computer sleeps Step 2 On a laptop, you can access the power options by right-clicking on battery indicator in the taskbar tools. There are two other, default power plans alongside Balanced; Power Saver is designed to reduce energy use by scaling back performance when possible. Good for laptops using battery power. 133 Power and sleep settings | 10:49 AB eo ® 13/10/2021 eo 132 www.pclpublications.com The High Performance power plan is, as the name suggests, best for overall performance, but will use more power and is unsuitable for use on a laptop using battery power. To switch between power plans, simply select the one you want to use. For many users, this is all you will need to do. ® > Contro! Panel » Hardware and Sound » Power Options > Create a Power Plan Create a power plan Start with an existing plan and give it a name. @ Balanced (recommended) Automatically balances performance with gr" consumption on capable hardware. OPower saver Saves energy by reducing your computer's performance where possible, OHigh performance Favours performance but may use more energy. Plan name: [My Custom Plan 1 Step 4 To customise any of the power plans, click the link next to the relevant one. The next screen will let you set when the display turns off and when the computer sleeps after inactivity.

You can also click “Change Advanced Power Settings” to see settings for the hard disk, desktop, USB and processor and more. Advanced settings Select the power plan that you want to customise, then 3 choose settings that reflect how you want your computer to manage power. Manage Your Privac in Windows 11 Controlling security on your computer is important but almost as important is being able to control your privacy settings. Microsoft have launched a web-based privacy dashboard tool and this great tool is available to all Windows 11 users. The Privacy Dashboard The privacy dashboard is web-based rather than in the settings and it allows you to manage multiple devices from a single interface, as long as you are logged in to a single account. Step 1 : : microsoft.com/privacy. If prompted, use your Microsoft account details to log in. You will be logged in to the privacy overview page that lets you quickly see what privacy settings the dashboard contains and controls. Privacy Welcome to your privacy dashboard Along with the main Search, Browsing and Step 2 t r Location privacy categories, if you scroll down to the bottom of the page you will see entries for everything from Apps to Xbox, with simple links to take you to the settings and options for those privacy areas. Manage your privacy settings Find out how to manage your privacy settings in products and services aa vy) Windows Xbox More privacy settings Learn about managing ad preferences, app and servi Review ad settings View agp access detais 134 www.pclpublications.com Open your browser and navigate to www.account. Click on one of the main categories, Search, Browsing, Location or Cortana, and you will see more information. This could include a list of searches you have made or websites visited (in Edge only, not other browsers), interests Cortana has saved for you or locations you have been. Your privacy Search history Each section has a Clear button, whether that is clearing browsing history, search history and so on. It is next to a warning that states clearing data will stop Windows being able to provide you with accurate and relevant information. You need to decide what is more important, privacy or recommendations. If you choose to dear your search history, we won't be able to provide you with better search results, suggestions, recommendations and other personalised experiences. If you want to be anonymous when you search without daring your search history, you can always open an InPrivate window in Microsoft Edge. Are you sure you want to clear search history? Removing Malware from Windows 11 The Windows 11 Defender and Security suite is very good, but what if you're unlucky enough to already have some form of digital infection? Thankfully, there's a way to remove malware and viruses from your computer. Malware Busters For this tutorial we'll use a pre-configured rescue disk from Kaspersky. We'll need to transfer, or burn, the disk contents to a CD or a USB stick and boot into the safe environment through one of those mediums. Step 1 Make sure you have a blank CD or a USB stick Step 3 Click the Select option, and using Windows that's at least 1GB in size. The Kaspersky Rescue Explorer, locate the downloaded Kaspersky Rescue Disk is downloaded as an ISO (which is an image file containing all ISO -it'll be called krd.iso. Click the Start button to select the image the disk information), and can be downloaded from https://www. and continue with the process. This will copy the contents of the ISO kaspersky.com.au/ downloads/thank-you/free-rescue-disk. to the USB while also making the USB a bootable device. kaspersky Drive Properties Device THANK YOU FOR CHOOSING US TO HELP YOU RECOVER ESD-ISO (F:) [8 GB] YOUR PC Boot selection ' krd.iso "| © SELECT Persistent partition size 1 0 (No persistence) Partition scheme Target system MBR v BIOS or UEFI Rcke ieee ¥ Show advanced drive properties bene pa Format Options Kaspersky Los EETE Volume label Rescue Disk p aby er fle nh fromm new on KRD File system Cluster size Step m To transfer the ISO to a USB, download Rufus; Step 4 If you're using a CD, start by inserting the CD into which is an executable that doesn't require any the drive. Locate the downloaded Kaspersky installation, from: https://rufus.ie/. Insert your USB stick and Rescue ISO, right-click it and choose Burn Disc Image from the double-click Rufus. Check that the Device label is pointing to your context menu. Tick the 'Verify disc after burning' option, and click inserted USB stick, if not then you may need to close Rufus, remove _ the Burn button to start the process. 4 Disable Unneeded Startup Programs

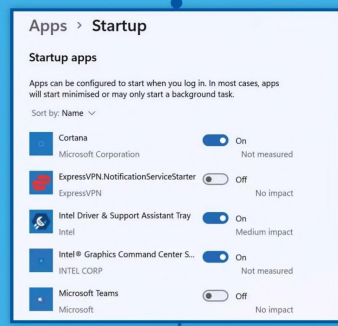
Now that you have removed any unwanted apps and software, it is time to check if any remaining apps are running unnecessarily at startup. Many software manufacturers will set their programs to start-up in the background when Windows 11 starts up. This helps the programs to open more quickly and makes sense for software you frequently use, but not for software you only use occasionally.

A quick way to see what software is running in the background is to look at the icons on the right side of the taskbar and open the hidden icons panel by clicking the small arrow. You can hover the mouse over icons to see what they are.

If you want to have a deeper look at which software initiates during startup, open Settings > Apps > Start-up. Here you will see a list of all startup apps, along with an estimation of their performance/speed impact and a slider to prevent each one from starting automatically.

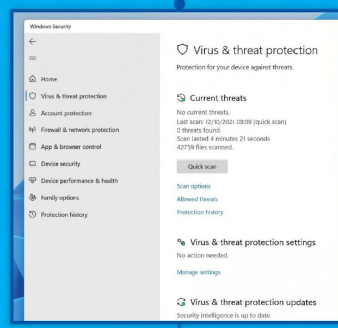


5 Scan for Viruses & Malware

Viruses, malware and other malicious software could cause your computer to run slowly or behave strangely. Things to look out for include: unexpected pop-up messages, programs that suddenly start or stop, or the sound of your hard disk constantly working.

To scan for and remove viruses, open Settings > Update & Security > Windows Security (previously Windows Defender) > Open Windows Security, click on "Virus Threats & Protection" and then click the "Quick Scan" button.

You can do a more advanced scan by clicking "Scan options" and choosing which you want to perform. If viruses or malware are found, you will be given options to quarantine and remove them.



6 Check for Corrupted System Files

Occasionally, the core system files in Windows can become corrupted (for a variety of reasons) and cause performance problems. Windows 11 includes a tool: the Deployment Image Service and Management Tool, that will check for such files and automatically replace them, either with a cached version or by downloading a new version.

Use the DISM Tool – In the Search box in the taskbar, type "powershell". Right-click on "Windows Powershell" in the results and choose "Run as Administrator" from the menu. At the Command prompt, that opens in the blue Powershell

Perform a Fresh Start How to Reset or Fresh Start Performing a Fresh Start allows you to do a clean reinstallation and update of Windows, while keeping your personal data and most Windows settings intact; an easier option than a full wipe and reinstall. Be aware that Fresh Start will remove most of your apps from your device, so you will have some reinstalling to do. In some cases, a clean installation may improve your device's start-up and shutdown experience, memory usage, Microsoft Store apps performance, browsing experience and battery life. Apps Apps & features Installed apps, app execution aliases Default apps Defaults for file and link types, other defaults Offline maps Downloads, storage location, map updates Optional features Extra functionality for your device Step 2 To find the Fresh Start tool, open the Windows Defender tool (click on the shield icon in the taskbar), and then click on the Device Performance & Health section. You will need to click on Additional Info and then click Give your PC a Fresh Start. If Fresh Start has previously been performed, the date will be displayed here. © Storage capacity ea bees sean No issues | & Device performance & health © Apps and software No issues & Family options © Protection history © Fresh start Start afresh with a clean and up-to-date installation of Windows. This will keep your personal files and some Windows settings and remove some of your apps. In some cases, this may improve your device's startup and shutdown experience, memory usage, Store apps performance, browsing experience and battery life. Additional information Microsoft recommends that you back up your files before making changes like a clean installation of Windows to your device. Make sure that you have access to all reinstallation media (such as CDs), product keys, license or login information and other materials needed to manually reinstall apps. < 38 Set up backup Select where you want to save your backup We recommend that you save your backup on an external hard drive. Save backup on: Backup Destination Free Space Total Size >rage (D:) [Recommended] Looking at the website that Windows 11 sends you to when you click on the Give your PC a Fresh Start link, there will be a blue Open Recovery Settings box. Click this, and you will automatically open the Recovery Settings section, or you can access it via System > Recovery. Give your PC a Fresh Start Windows 10 Resetting your PC lets you perform a clean reinstallation and update of Windows

while keeping your personal data and most Windows settings intact. In some cases, a clean installation may improve your device's performance, security, browsing experience, and battery life. To reset your PC, go to Start &l > Settings © > Update & Security © > Recovery © > Reset this PC > Get Started. Then, select Keep my files, choose cloud or local, chenge your settings, and set Restore preinstalled apps? to No. Note: if you dont see the option to Restore preinstalled apps, it means your PC doesn't have preinstalled apps configured. In versions of Windows 10 prior to version 2004 this feature was called Fresh Start and to use it you'd select Start tll > Settings © > Update & security © > Windows Defender > Device performance & health. As you can see, all roads lead back to the Recovery section in Windows 11. To perform a Fresh Start, you'll need to click the Reset PC button. This again brings up the option pop-up window. For a Fresh Start, you'll need to click the Remove Everything button. It's worth saying again: Ensure your data is backed up before doing this. Choose an option Keep my files Removes apps ar s, but keeps your personal files. Remove everything Removes all of your personal files, apps and settings | Step 6 | You'll now have the option to download Windows 11 and re-install it using the Cloud (meaning you'll download it from the Microsoft servers), or as a local reinstallation (which means you'll have a physical copy of Windows 11 either on disk or as a USB). Whichever method you prefer, click the box and the process will begin. How would you like to re-install Windows? Cloud download Download and re-install Windows Local reinstall Reinstall Windows from this device Cloud download can use more than 4 GB of data. 143 www.pclpublications.com
